

### *Owairaka Seeds Catalogue 2025*

| Name   | Description   | Regular price |
|--|---|---------------|
| <b>Abutilon vitifolium seeds -(<br/>Abutilon, Indian Mallow)</b>                   | This extremely beautiful member of the mallow family is sought after by gardeners for its clusters of large saucer -shaped soft blue-purple flowers., which are upward facing unlike other abutilons. They can range from the occasional white form through pale to deep purple. The leaves are somewhat like a grape's , five lobed, like grey felt in appearance, dull green to grey above and lighter underneath, and are downy to touch. Flowers tend to be short lived but there is a great profusion produced in the summer months, and where it thrives it brightens up the garden in the summer months. | 4.9           |
| <b>Achillea filipendulina<br/>'Parkers Variety' seeds -<br/>(Fern Leaf Yarrow)</b> | This achillea has long ferny leaves, which are grey - green and aromatic. The flower heads are large and flat and are composed of tens of small bright yellow flowers, which make extremely good cut flowers. The plants form a vigorous clump and are frost hardy. Achillea filipendulina 'Parkers Variety' won the prestigious Royal Horticultural Award of Garden Merit.   | 4.9           |
| <b>Achillea millefolium 'Cerise<br/>Queen' seeds - ( Yarrow)</b>                   | This plant has rosy red flowers . It is drought tolerant and so makes a great xeriscape plant, and is useful for natural landscaping as well as being an excellent garden plant. Bees and other beneficial insects are attracted to it, and it makes an excellent cut flower and does well in a container. It flowers in the first year from seed about 4 months after germination.   | 4.9           |
| <b>Achillea millefolium</b>  | This mix will give flowers in colours of pink, red, white , apricot,  | 4.9           |

|   |   |      |
|---|---|------|
| <b>'Colorado' seeds - (Yarrow)</b>  | <p>beige, bronze and yellow. It flowers from Spring right through until the first frosts.</p> <p>It will flower four months after sowing.</p> <p>It likes well drained soil which is a little lean, but will adapt to most soils and can tolerate full sun and humid warm summers. It is suited to pots or containers and the flowers dry well. It tends to spread a little , so plan to divide the clumps in Spring or autumn to ensure it stays compact.</p> <p>The foliage is narrow mid green grey in colour and fern like, and forms a compact basal mound. It should be trimmed back to the basal leaves encourage further flowering. It flowers in the first year from seed.</p> |      |
| <b>Achillea millefolium<br/>'Favorite Berries'</b>  | <p>This mix is an excellent one for adding highlights to the garden, and is of course a great cut flower. You will get plants with flowers of cerise pink , shades of pink and red, apricot and peach, lavender, and colours in between . It flowers the first year from seed, about 4 months after germination.</p>  | 4.9  |
| <b>Acmella oleracea f dark<br/>leaved seeds - ( Bulls eye)</b>                                | <p>This an attractive small plant for edgings or the front of the border, and for containers. It has small round flowers which are a yellow brown, and each flower has a dark burgundy eye at its centre. Its flowers and leaves contain Spilanthol, an analgesic used medicinally for numbing toothaches.</p>  | 4.9  |
| <b>Aconitum carmichaelii<br/>Arendsii-Group seeds - (<br/>Monkshood, Chinese<br/>Aconite)</b> | <p>This is considered to be one of the best late summer and autumn flowering plants. It has very attractive tall branching flower stems which bear many beautiful, hooded, dark blue flowers. It has a sturdy habit and can be planted in pots . It has been awarded the Award of Garden Merit by the Royal Horticultural Society.</p> <p>Note : All parts of this plant, including the roots are poisonous</p>   | 4.9  |
| <b>Aconitum<br/>carmichaelii'Spatliese'</b>   | <p>This plant has very pretty pale cobalt blue flowers which of a good size . The flowers are produced on well branched heads in statuesque pyramids, with many side shoots to show off their beauty , and the dark</p>   | 4.90 |

|   |  |      |
|---|--|------|
|   | green glossy foliage is also very attractive. This plant belongs to the Wilsonii group, whose plants are more branched than other aconitums. It will die down in winter , but comes up again reliably in spring . They make excellent cut flowers, but be careful of the cut ends.   |      |
| <b>Agastache aurantianca<br/>'Apricot Sprite'</b> |  | 4.90 |
| <b>Agastache pallidiflora<br/>'Rose Mint'</b>     | This small growing aromatic leaved plant produces a continual mass of lavender-rose scented flowers. The flowers are produced from spring through to late autumn. It makes a lovely border plant and can also be used in a container.  | 4.90 |
| <b>Agastache rugosa f. albiflora</b>              | Agastache albiflora is an easily grown plant whose hooded white flowers are beloved all beneficial insects. It is a good subject for natural landscaping where its aromatic foliage and its flowers which are a magnet to bees , sits easily in a natural garden. Agastache is a plant which requires very low maintenance, and it is used traditionally for scent , tea and medical applications. It does well in a container as it is quite hardy , give it plenty of room. The plant flowers the first year from seed about 4 months after germination.                                       | 4.90 |
| <b>Agastache rupestris 'Apache Sunset'</b>        | This is considered to be one of the best flowering and hardiest of the agastaches. It has handsome sunset pink to burnt orange flowers, which flower for a long time, and are good for cutting . The fine feathery silvery foliage is also attractive, and aromatic.   | 4.90 |
| <b>Ageratum houstonianum<br/>'Timeless mix'</b>   | This plant mix has pretty fluffy flowers in shades of blue, pink , mauve, burgundy and white . The flowers grow on a well branched bushy plant. The flowers are good as a cut flower because they have tall sturdy stems and provide a light airy texture to bouquets. But they are also a valuable plant in the garden, where the mid green, heart shaped foliage with scalloped edges creates a useful foil for the flowers. The flowers are produced throughout light scent. Remove the old flowers to encourage further flowering, and tidy up the plant. The plant likes a position in full |      |

|  |   |     |
|--|---|-----|
|  | <p>sun , with moist well drained soil, though will tolerate partial shade, and doesn't have many pest and disease problems. It grows easily from seed, and can be used in containers as well as in the garden. It flowers in the first year from seed, about 3 months from germination. the summer, and bees and butterflies are attracted to their light scent. Remove the old flowers to encourage further flowering, and tidy up the plant. The plant likes a position in full sun , with moist well drained soil, though will tolerate partial shade, and doesn't have many pest and disease problems. It grows easily from seed, and can be used in containers as well as in the garden. It flowers in the first year from seed, about 3 months from germination.</p>  |     |
| <b>Agrostemma githago 'Queen Mix'</b>                                | <p>Agrostemma 'Queen Mix' produces dainty flowers in a mix of white, pink and lavender. It is a long flowering tall plant which makes an excellent cut flower, and lends an airy grace to a mixed border . Landscape gardeners, designing wild meadows use agrostemma in their wildflower fields, as they grow very well from scattered seed, and are not bothered by many pests. However they are quite tough plants, for all their delicate seeming flowers and stems . They also blend well with other wild flowers and look very pretty if planted in a group. They make a very good cut flower lasting well in the vase. They are one of the timeless flowers which gardeners over the years have cherished, coming originally from the British cornfields where they grew wild. Sadly they have all but died out in the wild.</p> |     |
| <b>Alcea ficifolia 'Happy Lights' seeds - (Fig leaved hollyhock)</b> | <p>Happy lights is a beautiful strain. It is a blend of white, pink, purple, red, and yellow blooms. It makes a bushy plant rather than having a single spire like the traditional hollyhocks, and will also flower in the first year from seed if sown early enough (May - September). This is a much more robust form of the common hollyhock native to Siberia. If you have problems with hollyhock rust then try this variety which is much more rust resistant. The plants grow to around 150 to 210cm tall, and produce large, single saucer shaped flowers that are 8 to 12cm wide from November to April. They make excellent cut flowers.</p>  | 4.9 |

|   |   |      |
|---|---|------|
|   | <p>It should be cut back after flowering, and prefers a moderately fertile well drained soil.</p> <p>This strain is easy to grow from seed , and is extremely hardy . It likes rich soil and full sun.</p>  |      |
| <b>Alcea rugosa var nigra ‘Jet Black’</b> | <p>This hollyhock has the deepest dark maroon red flowers which appear almost black in colour. Alcea ‘Jet Black’ is an old- fashioned plant , dating back to the 17 century. It has been very popular with gardeners through the years. This alcea performs well in most situations, and its tall nearly black single flowers are produced each year, benefiting the garden design with its structural properties. The plant dies down in winter, to a small rosette in warm temperatures and in cold ones will lose its leaves entirely. It will re-emerge in spring , and the flowers will take your breath away, they are so beautiful. Plant them along paths to provide a nice outline and fences to show off their beauty .</p> | 4.90 |
| <b>Alcea rosea-hyb ‘Purple Raimn’</b>     | <p>Unlike other rosea species hollyhocks which are biennial, this is a true perennial hollyhock strain and will come up each year for you, and flower for you with a minimum of care and fuss. It is a very handsome perennial hollyhock, which has dark purple-blue single flowers. If you sow it early enough in spring, it will flower in the first year for you. It is an easy plant to grow from seed, and requires little care and maintenance. Hollyhocks make an architectural statement in your garden adding interest with their remarkable pyramid shape. Try planting a row of them down a path leading to your house.</p>  | 7.30 |
| <b>Alcea rosea-hybr ‘Radiant Rose’</b>    | <p>Unlike other rosea species hollyhocks, this hollyhock is a true perennial hollyhock strain and will come up each year for you. and flower for you with a minimum of care and fuss. It is a very handsome perennial hollyhock, which has bright pink single flowers. If you sow it early enough in spring, it will flower in the first year for you. It is an easy plant to grow from seed, and requires little care and maintenance. Hollyhocks make an architectural statement in your garden adding interest with their remarkable pyramid shape. Try planting a row of them down a path leading to your house.</p>  | 7.30 |

|   |   |      |
|---|---|------|
| <b>Alcea rugosa seeds</b>                           | This very pretty hollyhock has large single soft yellow flowers to 90cm tall. It is resistant to Hollyhock rust, and looks dramatic in groups or planted against a fence for support.   | 4.9  |
| <b>Alchemilla mollis 'Select' seeds</b>             | This is an outstanding and easily grown plant for the shady border. It is a very beautiful small foliage plant, whose leaves catch the early morning dew and rain and capture the drops in their cupped leaves keeping them hanging like sparkling diamond drops. This selection has strong stems and very uniform foliage and is bred to be a more upright form of alchemilla. It has large clusters of many tiny chartreuse green flowers which are held above the leaves, in sprays. Both leaves and flowers can be used in flower arrangements. Can be grown in pots. | 4.9  |
| <b>Alstroemeria ligtu 'Dandy Candy mix'</b>         | This mix has bright colours: red, deep rose and picotee-type white with pink. They have particularly large flowers, which have dark stripes and yellow markings. They make an excellent cut flower lasting for about 2 weeks in the vase, and flower for weeks in the garden.   | 7.90 |
| <b>Amaranthus caudatus 'Emerald tassels'</b>        | This is a green flowering amaranthus, which fits in beautifully in all flower bouquet colours, with its trailing emerald flowers. It is a splendid plant for the garden with its lovely architectural weeping form and of course makes an excellent cut flower.   | 4.90 |
| <b>Amaranthus caudatus 'Coral Fountain'</b>         | This plant has unusual coral-pink tassels, and is an attractive form for flower arrangements with its weeping tassels. If you stake it upright it looks beautiful in the garden border, blending in with most other flowers.  | 4.9  |
| <b>Amaranthus cruentus 'Hot Biscuits' seeds</b>     | This is an upright amaranthus which has long rich copper seed heads which are excellent when used as a highlight amongst pale flowers in the garden. It makes a very good long lasting cut flower.  | 4.9  |
| <b>Ammobium alatum seeds - (Winged everlasting)</b> | Ammobium alatum is an attractive perennial plant. It is an Australian native. It has silver toned foliage which offsets the numerous small papery white flowers, which have big golden centres. It is a great flower for the garden flowering over an extended period in summer.  | 4.9  |

|  |   |      |
|--|---|------|
|  | <p>It is a useful cut flower adding substance to bouquets. The flowers can also be dried. It is a hardy plant, which likes a sunny spot and can be spectacular en masse. However it is best treated as a annual in cold conditions.</p>   |      |
| <b>Anemone huphensis ‘Rose Beauty’</b>             | <p>This anemone mixture has pretty, single, white to rose pink flowers in late summer and flowering into autumn. It is a valuable plant for the garden as it flowers profusely, giving a lovely, slightly aetherial display, just as the rest of the garden is beginning to look past its best. Also, as a bonus, Anemone ‘Rose Beauty’ makes a good cut flower. It dies down in the winter, coming back again in the spring with dark green leaves in a nice rounded bush. These plants are undemanding and easy care. They will grow in many situations from partial shade to full sunlight.</p>  | 4.90 |
| <b>Anemone multifida rubra ‘Anabella Deep Red’</b> | <p>This plant forms a low mound of green leaves which are shaped somewhat like a fern.</p> <p>In late spring it produces a lovely display of single deep-rose, carmine red, long-stemmed open flowers with a pale-yellow centre in profusion. It does not need any special attention. The flowers produce attractive fluffy seedheads after they have finished blooming which add interest to the garden in winter.</p> <p>This plant flowers best in full sun on rich, well-drained soil. It’s a good choice for a rock garden, a mixed border, or the edge of a woodland. It is drought tolerant, and resistant to rabbits. Butterflies are attracted to it. It makes an excellent container plant.</p> | 4.90 |
| <b>Anigozanthos flavidus</b>                       | <p>These Anigozanthos flavidus seeds will produce flowers in red shades. The flowers are prized for their lasting ability in a vase and make excellent cut flowers. The plant likes to grow in full sun and is not fussy as to the soil type, growing in a wide range of situations. It is a long lived plant lasting for up to 30 years in a garden, and takes very little care. Kangaroo paws make very good container plants being tough plants which can survive less than ideal conditions.</p>  | 4.90 |
| <b>Anigozanthos humilis</b>                        | <p>This Australian native plant has flowers in shades of red or orange or yellow. It flowers in winter through to spring when very little other colour is in the garden. It is a fantastic cut flower with stems reaching a metre sometimes. The plant can tolerate hot humid climates. It is frost tender and is best planted in sunny situations with well drained soil. Put it in a</p>  | 4.90 |

|   |  |      |
|---|--|------|
|   | container and it will do well for you, attracting birds and bees with its nectar rich flowers.   |      |
| <b>Anigozanthos manglesii seeds - ( Kangaroo Paw)</b>                   | This kangaroo paw is a well known one , as it is the western Australian floral emblem. It has red and green velvety flowers which are borne on long stems up to 120 cm . They make an excellent cut flower, and will flower in their second year from seed. The plants themselves grow well in sandy and gravelly well drained soils in full sun to part shade, and form clumps of strap - like leaves. They will do well in the garden , provided that they are protected from snails and slugs which love them. They can also be used as pot plants, and look good on a balcony. They are attractive to birds which love their nectar. The plant tolerates light frost only , so if your region gets heavy frost, then grow it as a potted plant so you can move it under shelter. | 4.9  |
| <b>Antirrhinum majus 'F1 Rocket Series Orchid' seeds - (Snapdragon)</b> | This plant is a very good garden specimen and also an excellent cut flower. It has pretty Orchid pink flowers, and the series is an AAS (All-American Selections) Winner.<br>The Rocket Series antirrhinums were specifically bred for the ability to withstand heat , and to bloom in summer. In temperate climates they are winter hardy. If you cut the deadheads back on the first blooming , the plant will produce a second blooming.  | 4.9  |
| <b>Antirrhinum majus ‘Giant Cherry’</b>                                 | Antirrhinum ‘Giant Cherry’ plants have warm glowing cherry red flowers and are excellent as a cut flower and for the garden. they are very easy to grow from seed and don't like to be too hot, performing well in temperature ranges between 15 -20 deg C.  | 4.90 |
| <b>Antirrhinum majus ‘Giant Scarlet’</b>                                | This brilliant scarlet snapdragon is a wonderful garden plant and also an excellent cut flower. It will grow to about 90 cm for you  | 4.90 |
| <b>Antirrhinum majus ‘Giant White’</b>                                  | This sparkling white snapdragon is a wonderful garden plant and also an excellent cut flower. It will grow to about 90 cm for you  | 4.90 |
| <b>Antirrhinum majus</b>  | Antirrhinum ‘Maryland Appleblossom’ is an excellent snapdragon for the   | 4.90 |

|  |   |     |
|--|---|-----|
| <b>'Maryland Appleblossom'</b>   | garden and is also a top quality snapdragon for cutting. The delicately coloured flowers are produced on long strong stems, which are very weather resistant and sturdy. It is a very early flowering antirrhinum, which flowers prolifically even in cool dull weather, but it can also tolerate hot weather as well. It makes a good container plant where it can perform to its best and show off its lovely flowers |     |
| <b>Antirrhinum majus 'Rust Resistant Giants Mix' seeds - ( Snapdragon)</b> | This antirrhinum strain is better at resisting the antirrhinum rust . It has very large flowers in a wide range of colours, is excellent for cutting and performs well in the garden  | 4.9 |
| <b>Antirrhinum majus F1 'Chantilly Bronze' seeds - (Snapdragon)</b>        | This snapdragon has open faced flowers of an attractive salmon/tangerine colour. It makes an excellent cut flower and performs well in cooler conditions. Its flowers are edible and can be used as a garnish, though the flowers have a floral slightly bitter taste.  | 4.9 |
| <b>Apium graveolens 'Chinese Pink' seeds - ( Celery)</b>                   | This is a uniquely coloured celery being a real lollipop pink, which does not lose its colour when cooked unlike many other vegetables. It has a strong and slightly sweet flavour and is probably best eaten young. Plant it quite close together and make new sowings every now and then. They like full sun and rich moist soil.   | 4.9 |
| <b>Aquilegia atrata seeds</b>  | This aquilegia is a lovely free flowering plant which has flowers of the deepest black red on many branching stems up to 60 cm and is a sought after species plant for the summer garden. It blooms in late spring and early summer. It prefers rich soils which have a good deal of humous and full sun or partial shade. It is frost hardy. It will do well in containers also.                                       | 4.9 |
| <b>Aquilegia x hybrida 'McKana's Giant Mix' seeds - ( Granny's Bonnet)</b> | This strain of aquilegia has very large flowers which have lovely combinations of white, pink, blue, yellow, pink, pale-blue, purple and scarlet, with clear coloured outer petals, and cream/white coloured inner petals. It will grow well in shady areas and will grow to about 75 cm tall. It blooms every year reliably, and makes a great show with its lovely , long spurred bi-coloured flowers and             | 4.9 |

|  |  |       |
|--|--|-------|
|  | makes a good cut flower. It makes an excellent container plant.  |       |
| <b>Aquilegia vulgaris 'Winky Double Rose White'</b>            | This aquilegia has upright facing double pink and rose flowers, unlike other aquilegias which hang their heads down. The flowers are produced in profusion on very strong stems. It performs well in the garden, smothering itself in pretty pink and white flowers. It is an easy care plant which will come up each year for you without fuss. It will reward you, for giving it a place in your garden, with not only its flowers, but also with its pretty fern like lacy foliage. It can also be used as an extremely attractive pot plant, if you keep it watered. | 10.50 |
| <b>Armeria maritima-hybr</b>                                   | Armeria 'Ornament' is a no fuss easy care little plant which forms small neat and tidy cushions of green leaves in your garden bed. From these cushions appear flowers in shades of red, pink lilac and white. The flowers are larger than the usual armeria and make good cut flowers. The plant likes well drained soil, which is a little on the dry side and can tolerate some drought.  | 4.90  |
| <b>Artemisia absinthium seeds - ( Wormwood)</b>                | Artemisia absinthium is grown chiefly for its silver green-grey foliage which adds interesting texture to garden plantings. It has a bushy growth habit. It is used for natural landscaping and for xeriscaping and for plantings where low maintenance is required. It is attractive to butterflies and other pollinators. The foliage is highly aromatic when crushed. It is also used as a medicinal plant and tea herb. It makes a good container plant for large pots.  | 4.9   |
| <b>Artemisia annua 'Sweet Annie' seeds - ( Sweet wormwood)</b> | This plant is a lovely fine and fragrant filler for flower bouquets, with its filagree leaves like that of a fern. It can also be used dry for winter dried arrangements. It is an ancient chinese medicinal herb.   | 4.9   |
| <b>Artemisia lactiflora seeds - (White Mugwort)</b>            | This plant has creamy white panicles of sweetly scented tiny white flowers which attract butterflies and bees. It is like a delicate giant white astilbe, which flowers from late summer into late autumn in warmer areas, on slightly curved arching stems. It won an Award of  | 4.9   |

|   |   |      |
|---|---|------|
|   | <p>Garden Merit from the RHS in 1993.</p> <p>For those of you who want a plant which will fit well into natural landscaping and perennial borders , this is a good one. Although it prefers moist soils , it tolerates drought well and the green silver backed leaves have an aromatic scent. It is easy to grow, and will tolerate part shade. It makes a good cut flower. Cut back in the autumn.</p>  |      |
| <b>Artemisia ludoviciana</b>                              | <p>This plant is grown for its wonderful silver grey foliage , which lights up the plants which it is placed next to in the border with its lovely contrasting foliage . Its foliage is aromatic when you touch and bruise it . It produces small yellow flowers which are inconspicuous, but pleasantly scented which makes it nice for an outdoor seating area. The experts recommend these are removed to prevent self seeding . The plant spreads by rhizomes, and in some situations can self seed, so keep an eye out for unwanted growth. It can withstand some dry conditions, and likes well drained soil in full sun. Cut it back to the ground in autumn. Its foliage is excellent for floral arrangements, and makes a good container plant .</p> | 4.90 |
| <b>Aruncus aethusifolius</b>                              | <p>This plant has beautiful fine feathery foliage, from which arise pretty white flowers, on red flushed stems. The flowers smother the small bush Aruncus aethusifolius gained the award of Perennial Plant of the Year in Sweden in 2010 and also the RHS 'Award of Merit'. It makes a good cut flower .</p> <p>Plant it in full sun down in southern cool summer climates and in the north plant it in semi-shade</p>  | 4.90 |
| <b>Asclepias curassavica</b><br><b>'Silky Gold' seeds</b> | <p>This milkweed has clusters of 10cm golden yellow flowers on long stems . It makes a good cut flower, is showy in the garden and is very attractive to honey bees and butterflies particularly the monarch .</p>  | 4.90 |
| <b>Asclepias incarnata</b><br><b>'Soulmate'</b>           | <p>Asclepias 'Soulmate' is a preferred plant for the monarch butterfly. It has clusters of pink flowers which have the scent of vanilla,</p>  | 4.90 |

|   |  |     |
|---|--|-----|
|   | which likes moist clay soils, and makes a very attractive garden plant.  |     |
| <b>Asphodeline lutea seeds - (Yellow Candle, Kings Spear)</b>                       | This plant has handsome spikes of unusual spear shaped , fragrant yellow flowers which rise well above the foliage to create a striking display in the garden. The strap like foliage is a blue green colour, and the flower makes a good cut flower and is attractive to bees and other pollinating insects. It is an evergreen, clumping plant which is tolerant of most soils and can be used in dry places.  | 4.9 |
| <b>Aster callistephus chinensis 'Giant Ray White' seeds - (Giant Quilled Aster)</b> | Aster 'Giant Ray White' produces extra large peony type flowers in a clear white. The flowers are borne on bushy well-branched plants. It is sought after for its finely pointed petals which create a frilly effect. It makes an excellent cut flower as well as a great display in the garden. It is an annual and as it grows to approx 60cm, it has good, long stems for cutting. It prefers a sunny position, in well drained soil.   | 4.9 |
| <b>Aster callistephus chinensis 'Tiger Paw Sea Star Mix ' seeds</b>                 | The flowers on these plants come in a lovely range of colours from whites and creams through pink shades and blues to purples . Each flower is a lovely shape and is a very large size. The flowers are bred for the cut flower market so they are excellent for cutting and last well in a vase , but they are also very lovely massed in the garden, where they perform well and fill those awkward spaces where you just want something to bloom freely for the summer months.  | 4.9 |
| <b>Aster tongolensis 'Wartburg Star'</b>  | This very showy aster is unlike any other aster. It is prized by florists as it is an excellent , long lasting cut flower. It bears beautiful rich violet blue flowers all through summer, with golden centres. The 5 cm flowers are produced singly, on lovely long wiry 30 cm stems which are perfect for cutting, and the blue daisies are produced in masses. They are loved by all pollinating insects. This plant will spread by rhizomes gradually, ending up eventually as a clump about 40 – 50 cm wide. It likes full sun and moderately fertile |     |

|  |   |     |
|--|---|-----|
|  | soil with average moisture. You can divide the clumps in autumn if you need to . It makes an excellent container plant.   |     |
| <b>Aster turbinellus seeds - (Symphotrichum turbellinum , Smooth Violet Prairie Aster)</b> | This easy care plant produces very pretty arching sprays of lavender blue daisy shaped flowers in autumn when there is very little else in the garden. It is a winner of the prestigious Award of garden Merit From The RHS for its garden qualities. It flowers for weeks on a bushy plant, and it is mildew resistant. It works well in mixed borders and attracts beneficial insects, such as birds and butterflies and bees, being a great source of nectar for them. It can also withstand approx -15 dec C and can also be grown in dry areas, being a good plant for areas which are naturally dry. It makes a good specimen plant, to grow in a container. It grows in full sun but will also grow in partial shade.If you pinch the stems back before mid summer you can encourage a bushier plant with more flowers and this will also reduce the plant height. Divide the plant every 3-5 years. | 4.9 |
| <b>Astilbe Arendsii hybrid 'Bunter Zauber' seeds</b>                                       | This plant produces violet, red, pink, cream and white flowers in summer on a background of dark green leaves which are serrated and set off the flowers perfectly. The plant forms a clump, with slender flowering panicles.<br>It is a plant which does not mind shade, but must have adequate light to flower. In northern regions of NZ they will be best in moist shady spots which still get adequate light ( the south side of your house should be good so long as there is light and the soil doesn't dry out too much ). In Southern regions give them more sun but part shade.They need rich moist soil and lots of compost.It makes an excellent container plant.<br>This plant is a good cut flower and makes great dried bouquets.  | 4.9 |
| <b>Astragalus membranaceus var mongholicus</b>   | This plant is chiefly grown for its inflated red tinged seed husks, and high content of astragalosid IV, and roots which are used in traditional chinese medicine .<br>The flowers are light yellow and are produced in Summer, but it is   |     |

|  |  |      |

|  | the seed pods which are most decorative.   |      |
| <b>Astrantia major seeds - (Great Masterwort)</b>                    | <p>This plant is both long flowering and long lived. It has very showy star shaped heads from which pink, green or white bracts radiate wafting a sweet scent . Each blossom is an umbel of tiny flowers surrounded by a whorl of papery bracts. It flowers continuously throughout summer and autumn. It prefers part shade and rich moist soil, with cooler night time temperatures in the summer, and is very useful for that shady spot where many other sun lovers will not grow. It is not common in most gardens , but should be better known and cultivated according to many knowledgeable gardeners It is native to Central and Eastern Europe.</p> <p>Astrantia make excellent, long lasting cut flowers.</p> | 4.9  |
| <b>Banksia ashbyi ssp boreoscala</b>                                 | <p>This very attractive, smaller growing banksia is ideal for a smaller garden , growing to 1.5 * 1.5 m. It has attractive serrated grey green foliage and produces large orange, candle like flowers which are set off well against the leaves. The flowers are nectar rich and bees and birds are attracted to them. The plant forms a dense rounded bush. It makes a great container plant with its handsome orange flowers, and grows just as well in the garden. It likes well drained sandy soil in full sun. It will become very drought tolerant once established and is great to use in a dry spot.</p>   | 5.70 |
| <b>Baptisia australis 'Caspian Blue' seeds - (False Blue Indigo)</b> | <p>This long lived and trouble free plant bears a myriad of blue pea type flowers, which are somewhat like those of a lupin, and grows to a small bush. It is almost insect free and disease resistant making it a low maintenance plant for the garden. It makes a good container plant. Its flowers are good for cutting and as an additional bonus its seed pods make an attractive accent in floral arrangements.</p> <p>It was historically used for medicinal purposes by the Native American people.</p> <p>It has won the award of garden merit from the Royal Horticultural Society, and was also selected as the plant of the year by the</p>  | 6.30 |

|  |   |      |
|--|---|------|
|  | Perennial Plant Association.  |      |
| <b>Boltonia asteroides var latisquama 'Nana' ( False Chamomile)</b>  | This plant is a sturdy perennial which is easily grown from seed and takes little care. It will reward you with charming , showy white to pink to lilac sprays of small starry flowers in mid to late summer , which make excellent cut flowers. It can tolerate a range of soils including moderately dry, but prefers soils which is moderately moist and of medium richness. It can be used in natural landscaping, and as a tall container plant in a large pot, for the back of a paved area, so long as you repot it regularly when it outgrows its container.  | 4.9  |
| <b>Brassica oleracia 'Dazzling Blue' seeds- ( Kale)</b>              | This cavolo nero type kale has a blue-green leaf with handsome pink veins. It stands cold winter temperatures well, grows upright, and has an excellent taste. It can be used in stir fries, steamed , and even used in salads, if sliced quite finely.   | 4.9  |
| <b>Briza maxima seeds- (Greater Quaking Grass)</b>                   | This is a very beautiful slender annual grass, which is a very useful addition to the garden and also is a pretty cut flower. It produces pale green papery seed heads which look like tiny paper lanterns which dance and glint in the sun in a light breeze. It is an excellent addition to the garden border to provide interest and movement. If the seed heads are included in a flower arrangement in a dark area, it will catch stray beams of light and reflect them with a shimmering quality like droplets of water. The seed heads dry well and can be used in dried arrangements. It will self sow. | 4.9  |
| <b>Calamintha nepeta 'White Cloud' seeds - (White Cloud Catmint)</b> | This is a very valuable , seemingly perpetual flowering perennial which is very useful for edging borders. It forms mounds of sweetly scented leaves and bears clouds of dainty white flowers in short sprays. The plant flowers its heart out through summer and into autumn and is very attractive to bees and butterflies. It makes an excellent container plant. It flowers in the first year from seed, about 5 months after germination.  | 4.90 |
| <b>Calendula officinalis 'Zeolights' seeds - (Pot</b>                | This calendula is a beautiful double frilly flower. Its face is a delightful lollipop mixture of pink and lemon and the back of the   | 4.9  |

|   |   |      |
|---|---|------|
| <b>Marigold)</b>  | flower is maroon. It will brighten up the dullest garden. It will produce flowers over a long period so long as the seed heads are trimmed. Calendula are easy to grow and don't seem to be bothered by many pests. It makes a very good cut flower, and can also be used to advantage in pots and bedding.   |      |
| <b>Camassia leichtlinii Alba seeds</b>                                      | This plant has white which are star-shaped. Can tolerate more moisture than most other bulbous plants. Robust 60cm stems emerge from mounds which are like grass, with many 7cm star shaped white blooms in spring to early summer. This plant Will produce a small amount of progeny if it is sited in a wet spring site with at least a half day of sunshine. It occurs in wet to moist meadows and ditches in when in its native situation. It makes an excellent cut flower, which is in its element in rain gardens, at the pond edge, and in the seasonal bog. It likes fertile acidic soil           | 4.9  |
| <b>Campanula lactiflora 'New Varieties'</b>                                 | This beautiful plant produces trusses of pretty flowers in rose, light violet blue and white shades for all of summer and if you cut it back it will bloom again for you in autumn in northern areas. It is very easy to grow, and requires very little care. It will reward you for its place in your garden with beauty for all of summer and autumn. Campanula lactiflora grows naturally in partial shade, on the borders of woodland areas in its native Turkey, but will do well also in full sun where the soil retains some moisture, in any part of New Zealand. The flowers are good for cutting. | 4.90 |
| <b>Campanula persicifolia 'White Bell' seeds - (Peach Leaf Bell Flower)</b> | This plant is one of the most popular campanulas. It grows slowly into a mound shaped plant. It has pure white, cup-shaped flowers appearing from mid December to January, the large nodding bell shaped flower stalks are held above glossy mounds of attractive, emerald green, strap-like foliage to 75cm. The flowers are good for cutting.   | 4.9  |

|  |  |      |
|--|--|------|
|  | It likes moist but well drained soil, and a full sun aspect for at least 6 hours per day. Can tolerate some shade.<br>It is native to the mountains of Europe and Asia.  |      |
| <b>Cartharanthus Roseus 'Heatwave Mix' seeds- (Vinca, Madagascar periwinkle)</b> | This is a hardy summer annual with very glossy green leaves. It has large flowers in reds, pinks, mauves and white. It makes an excellent container plant and also looks very pretty in garden beds. It flowers throughout the summer and will tolerate hot dry situations. It forms a bushy, dwarf mound of colourful flowers which can be used as a ground cover if plants are placed close together. Plants tolerate heat very well, if kept watered.   | 4.90 |
| <b>Celosia cristata 'Crystal beauty' seeds – ( Crested coxcomb)</b>              | This celosia has peach and sherry flowers which appear to shine in the sunlight. The flowers are approx 10cm and are borne on well branched, sturdy stems up to about a metre long. They are excellent for cutting, lasting well in the vase, and make a great show in the garden.   | 4.90 |
| <b>Celosia argentea cristata 'Temple Bells' - (Cockscomb)</b>                    | This seed produces a stout bushy plant to approx 100cm which is well rounded and nicely branched. It is an extremely good cut flower and the seed produces flowering plants in a nice range of colours. The flowers are 10-20 cm across, and are equally good as a garden subject or as a cut flower.  | 4.9  |
| <b>Celosia argentea var cristata 'Sylphid' seeds</b>                             | The flowers of this plant are used as a bouquet filler, because it produces flowers which complement almost every colour scheme. It has lemony-lime coloured tall, straight stemmed feathery flower plumes which are about 80cm high.  | 5.6  |
| <b>Celosia argentea var plumosa 'Pampas Plume Mix' seeds</b>                     | These flowers are grown for their wispy, slightly-pampas-grass like plumes, which make excellent cut flowers, and can be cut again and again. They are very vigorous plants which produce flowers in abundance. They love hot dry conditions, so the northern summer if it continues as it did last year, will be great for them, as will the southern areas which have long dry hot summers, and they will bloom all summer for you. This mix includes pale lemon, apricot, cream, cranberry and soft orange. | 4.9  |

|  |   |      |
|--|---|------|
| <b>Celosia cristata 'Chief Mix' - ( Crested Coxcomb) seeds</b> | These plants have 60 cm stems with 15 cm velvety flowers shaped a little like cauliflowers. This range was selected for the cut flower market , but they are spectacular in the garden as well. There is a mix of rich colours: Carmine, Fire, Gold, Persimmon, Red, and Rose. Flowers last for 3 weeks in a vase.  | 4.9  |
| <b>Celosia spicata 'Flamingo Feathers seeds</b>                | This celosia has light pink pointed flowers which turn blush pink as they age. They are like paintbrushes and look great in flower arrangements, making an excellent cut flower. The plants like warm temperatures, are surprisingly hardy in dry conditions and branch well. They smother themselves in flowers in summer.   | 4.9  |
| <b>Celosia spicata 'Flamingo Feathers Purple' seeds</b>        | This celosia has bright purple pointed flowers which turn darker as they age. They are like paintbrushes and look great in flower arrangements, making an excellent cut flower. The plants like warm temperatures, are surprisingly hardy in dry conditions and branch well. They smother themselves in flowers in summer.  | 4.9  |
| <b>Centaurea cyanus 'Florence Mix'</b>                         | Centaurea 'Florence mix' seeds is a smaller more compact plant than the usual cornflower, and will not take up as much room in your garden. There is a mix of blues pinks rose , red whites and many shades between. The flowers are 5c wide and are fringed. It makes an ideal garden subject and is excellent for growing in pots. They make a very good cut flower | 4.90 |
| <b>Centaurea dealbata</b>                                      | This perennial cornflower has attractive grey green leaves and forms an attractive small clump which looks good in the sunny border. In early summer it produces a pretty display of rosy pink flowers. This plant is an easy care plant which grows without much care in most soil types and climates.   |      |
| <b>Centaurea moschata 'The Bride' seeds - ( Sweet Sultan)</b>  | This is a lovely old fashioned flower which has been cultivated in cottage gardens for centuries. It has pure white fluffy white flowers which are especially good for picking, but which also look attractive in the garden and work well as a filler between other plants.  | 4.9  |
| <b>Centaurea pulcherrima</b>                                   | This plant has large rose pink cornflowers above rosettes of silvery  | 5.5  |

|   |   |      |
|---|---|------|
| <b>seeds - ( Batchelor's Button, Star Thistle)</b>                  | deeply indented leaves. It is a tallish grower. It will gradually form a clump, and should be divided every few years to maintain its vigour.   |      |
| <b>Centaurea ruthenica seeds - (Russian Knapweed, Star Thistle)</b> | This is a very rare plant from Russia and Romania. It has long straight green 120 cm stems, with prominent dark green, pointed ferny foliage with grey undersides. Its flowers have fluffy thistle-style heads which are a pale citron yellow with very fine crinkled tissue buff-colored bracts . Very few fertile seeds are collected.<br>The plant tolerates some drought, and likes well drained soil in a sunny position. Foliage dies down in winter and reemerges in spring. It is a good plant for the mid to back border of a garden. The flowers are excellent for cutting. | 6.3  |
| <b>Cephalaria gigantea seeds - (Giant Pincushion Flower)</b>        | This plant is best placed at the back of the border as it grows to approx 1.5metres. However it doesn't take up much room as the flowers and leaves are compact and airy. The flowers are large and resemble scabiosa or pin cushion flowers . They are a pretty creamy light yellow. It makes an excellent cut flower.   | 4.90 |
| <b>Chelone lyonii</b>   | This is a small bushy plant to about 40cm which has pink blooms in clusters in mid summer through to autumn. The leaves themselves are very attractive being a lustrous green. It can be pruned to shape it , but even without pruning it will develop into a nice compact bush for you. It likes a moist soil and a sun filtered partly shaded woodland site. It does not like hot dry conditions. If you live in the north, ensure the plant is in partial shade in a cool spot and cover the soil with a thick mulch to keep it moist. The blooms make a good cut flower .         | 4.90 |
| <b>Chenopodium quinoa ‘ Brilliant Shining Rainbow,</b>              | This mix is a combination of some of the best quinoa seeds from our supplier . It contains Magenta Sunset a selection made with the cut flower grower in mind. The ripening panicles are brilliant magenta-orange, with stems that become red-pink-orange striped as they mature. Also in the mix is ‘Ivory’ selected for resistance to downy mildew and head sprouting, better stem strength, and white  | 4.90 |

|  |   |      |
|--|---|------|
|  | seed color. White panicles help prevent seed staining from rain at maturity. Also included is 'Golden Afternoon' which is a new variety. Seeds are a sunny yellow fresh from the plant, and have good resistance to head sprouting in trials for 2 years running. The last inclusion is 'Pink Nugget' which has rounded pink seed clusters that form a large head.  |      |
| <b>Chorizema cordatum</b>                                    | This Australian plant is a scrambling vine , able to climb to about 2 metres. It is considered to be one of the plants that are indispensable in a garden by many plantspeople . Chorizema cordata transforms itself when it flowers with a wonderful display of red, orange and yellow pea-shaped flowers. The flowers are produced at the end of the leaves in racemes of 20 or more blooms. As it is a scrambling , lax stemmed shrub, it is best grown as an understorey plant in a garden where it can take advantage of other larger shrubs to support it . This plant makes an excellent subject for a dull slightly shady area with dappled light in the garden, as it will make a great splash of colour in late winter for you, brightening the area. Cut the plant back by about a third after flowering to get new growth and flowers in the next year. It can withstand some dryness, but performs better with some water from time to time. It will recover from a light frost, but will not tolerate a heavy frost | 4.90 |
| <b>Chorizema diversifolium seeds - ( Climbing Flame Pea)</b> | This Australian native is a small trailing shrub or small climber to about 1 m. Its flowers can be pink red or orange, or a mix of these colours. It flowers in spring and summer. It likes a sandy well drained soil, and likes some shade. It will grow well as a container plant .   | 4.9  |
| <b>Chrysanthemum carinatum 'Rainbow Mix'</b>                 | Chrysanthemum 'Rainbow Mix' is a wonderful border plant which has beautiful bright flowers and each have multiple colours in the one flower. Its almost as if a painter has carefully tried out the palette that they have to see how a multicoloured flower experiment will turn out . These are charming rainbow flowers  |      |

|  |  |      |
|--|--|------|
|  | which make an eye-catching display when planted in a swathe in a flower border . For those of you who like being able to cut your own flowers for the vase this painted daisy makes an excellent cut flower  |      |
| <b>Cirsium Japonica 'Pink Beauty' seeds</b>            | This plant has soft pink petalled flowers which produce flowers on long strong stems in its first year if you sow it early enough in the season. It is an excellent cut flower and looks handsome in the garden with its strong thistle like form. The plants are almost completely without thorns   | 4.90 |
| <b>Cistanthe grandiflora</b>                           | Cistanthe grandiflora is a very attractive succulent from Chile. It is a hardy perennial withstanding temperatures down to -6 deg C. It forms compact grey green clumps of leaves approx 30cm tall from which arise beautiful neon magenta coloured flowers which resemble fragile poppies on long stems approx 90cm tall. The plant flowers from spring to autumn. It can withstand drought very well , needing only occasional watering. | 4.90 |
| <b>Cistanthe grandiflora. Var White</b>                | Cistanthe grandiflora is a very attractive succulent from Chile. It is a hardy perennial withstanding temperatures down to -6 deg C. It forms compact grey green clumps of leaves approx 30cm tall from which arise beautiful white flowers which resemble fragile poppies on long stems approx 90cm tall. The plant flowers from spring to autumn. It can withstand drought very well , needing only occasional watering.                 | 4.90 |
| <b>Cistus albidus 'Pink Silk ' Seeds –( Rock Rose)</b> | This plant has very pretty large ruffled pink flowers with paler pink centres and four black marks . It loves hot locations and will grow to about 90cm high . It is a hardy plant which takes very little care once established   | 5.90 |
| <b>Clematis integrifolia 'Mongolian Bells' seeds</b>   | This is a compact clematis which has large bell shaped flowers in shades of blue, lavender, pink, purple blue and white. It grows in a compact bushy form, and looks good as a small individual plant or   | 4.9  |

|  |  |      |
|--|--|------|
|  | can also be used with several plants grown together as a ground cover.   |      |
| <b>Clematis patens' Baby Alba' seeds</b>     | <p>This is a small compact dwarf clematis which grows to about 1.5 m. It produces lovely white flowers in abundance. The flowers have a small flush of pink at the base of each petal, and have central stamens of bright yellow. Clematis 'Baby Alba' flowers from spring through to autumn, and can be grown in containers, or as a feature plant on a patio where it will provide a beautiful display. Given a small trellis or some other support for climbing. It does well in full sun and adapts well to partial shade, and likes moist well-drained soils. It attracts bees and butterflies, and just needs the flowers deadheaded to prolong its flowering.</p> <p><b>5 seeds in packet</b></p>             | 6.70 |
| <b>Clematis patens' Baby Sangria'</b>        | <p>This is a small compact dwarf clematis which grows to about 1.5 m. It produces lovely velvety red /Sangria coloured flowers in abundance. The flowers have a dark central bar on each petal, and have central stamens of bright yellow. Clematis 'Baby Sangria' flowers from spring through to autumn, and can be grown in containers, or as a feature plant on a patio where it will provide a beautiful display. It is a compact branching plant which produces flowers throughout summer.  | 4.9  |
| <b>Cosmos bipinnatus 'Peppermint Twist' seeds</b> | This cosmos has big, bright white petals which are striped and edged with rosy-red and have bright yellow centres. The flowers are borne on 1 metre tall stems throughout summer. This is an easy care beauty that performs well in the garden and makes an attractive bedding plant and cutflower which birds and butterflies love  | 4.9  |
| <b>Cosmos bipinnatus 'Tickle Pink'</b>            | Cosmos 'Tickle pink' is a completely new cosmos grown by our supplier. It has sturdy, healthy plants, which are 1 – 1.5 m tall. The plant smothers itself in hot pink flowers. Cosmos 'Tickle Pink' flowers bear erect finger-like petals from the central disk as well as having the expected centre of petals around the disk. It is a great performer which will produce large quantities of lovely flowers until the frost arrives. This plant makes an excellent cut flower, which does | 4.90 |
| <b>Cosmos bipinnatus 'Xsenia' seeds</b>           | This cosmos is a very showy plant, which forms a nice compact bush, has unusual terracotta rose coloured flowers, in many shades, which give a bouquet of the flowers a glowing quality. The flowers are rose at the edges and flower center, with terracotta orange in the mid-petals. As the flower matures, the colour fades to a warm, antique rose, the flower petals are tightly packed and the plant grows in a compact form to approx 65cm.  | 4.9  |
| <b>Cosmos bipinnatus 'Apricot Lemonade' seeds</b> | This is a very unusually coloured cosmos. Petals start off a soft apricot with pale lavender base and reverse, and then when they mature they become pale yellow. With new and maturing flowers  | 4.9  |

|   |   |      |
|---|---|------|
|   | on the same plant the result is a lovely mix of colours on the same plant.  |      |
| <b>Cosmos Cupcakes 'Blush' seeds</b>                          | This cosmos has semi double, double and some single cup shaped blooms whose petals are fused together to form a teacup shaped flower which has edges serrated as if they have been cut with pinking shears. They are the most delicate of pinks, and some are striped with pink and darker pink. they are excellent for floral wedding work.  | 4.9  |
| <b>Craspedia globosa 'Billy Buttons' seeds - (Drumsticks)</b> | This plant, an Australian native, has round bright yellow 2.5-3cm ball like flowers on 70 cm stems. It is prized for its usefulness as a cut flower which has a long vase life and can be dried as well.  | 4.9  |
| <b>Cyanthamnos ramosus</b>                                    | This plant is a native of Australia. It is a small shrub growing to about 40 cm high and 30-40cm wide. It produces lovely, delicate and fragrant blue or white flowers, and makes a pretty bush for your garden, and can be grown very successfully in pots on your patio to savour their fragrance so long as the soil is well drained, and gets consistent water without being waterlogged. The flowers are a favourite of florists, making an unusual and fragrant cut flower. The scent is typical of the boronia family, and is a light perfume which will not overpower other plants. The flowers are usually produced during the late autumn and winter, which is a very useful time of the year, flowering when many other plants are finished. It likes a free draining soil, in a sheltered spot, and can withstand some frost as well as being drought resistant. Plant it where it gets full sun in the morning but dappled sunlight in the afternoon if the sun gets hot where you live. | 4.90 |
| <b>Cynoglossum amabilis seeds -( Chinese forget-me-not)</b>   | This forget-me-not is a well known cottage garden plant, which is a pretty gap filler. It has brilliant bright blue forget-me-not like flowers on long stems in the height of summer. It is quick and easy to grow and self seeds easily. Deadhead if self seeding is not required. It makes a good cut flower, and will repeat well as long as you cut off   | 4.9  |

|  |   |      |
|--|---|------|
|  | the spent flower heads.<br>It will grow in full sun or part shade and will tolerate dry conditions.   |      |
| <b>Dahlia variabilis 'Black Beauty' seeds</b>            | These plants are short and compact about 35 cm high . They suit containers and the front of the border and small beds. The flowers are very dark velvety red, which appear almost black. They like a warm sunny position, and will flower right through summer and into autumn. It flowers in the first year from seed if sown in early spring under cover. It will take about 3 months from germination to flower. | 5.70 |
| <b>Dahlia variabilis 'Bishops children'</b>              | Dahlia 'Bishop's Children' has very pretty large flowers set off well against handsome bronze foliage. Its flowers are in the colour ranges of reds, pinks salmons oranges and golds, and all are on long strong stems making it an excellent cut flower. It flowers the first year from seed. It makes a wonderful bedding plant and is also great in containers.  | 5.70 |
| <b>Dahlia variabilis 'Giant Hybrids Mix' seeds</b>       | This is a selection of large flowered dahlias. There are single semi double and double varieties in many colours.   | 4.9  |
| <b>Datura meteloides 'Evening Fragrance'</b>             | Datura meteloides 'Evening Fragrance' has very large super fragrant pure white velvet blooms which have a soft lavender picotee edge. This plant makes an excellent pot plant in a large container. Place near the patio or living areas where the evening fragrance can be appreciated. They tolerate windy and wet conditions well, and can grow in many soil conditions.   | 5.20 |
| <b>Daucus carota 'Dara' seeds - ( Ornamental carrot)</b> | This is a non-fading or much reduced fading type of Daucus carota. It has pink to burgundy-red flowers throughout the bloom season, and is a much sought after variety as a specialty cutflower and is also a pretty filler in the garden. It has nicely aromatic , ferny carrot foliage, and bees and butterflies love it.   | 4.9  |
| <b>Delphinium elatum ' New Zealand Hybrids'</b>          | This is a wonderful mixture by Jelitto seeds of open pollinated New Millennium Delphiniums from especially selected stock originally from New Zealand. There is a wide range of colour shades, outstanding colours and flower shapes with magnificently full  | 4.90 |

|   |  |      |
|---|--|------|
|   | blossoms, stable and strong flower stalks. The plants have vigorous growth, and are winter hardy. They also tolerate warmer and humid climates very well. They make good cut flowers, and flower in the first year from seed, about 6 months after germination. They are an amazingly hardy plant and take little care once they are established .   |      |
| <b>Dianthus caryophyllus<br/>'Lemon Fizz'</b>                                 | Dianthus 'Lemon Fizz' has creamy yellow fully double flowers on 60 cm stems. It is an excellent flower for cutting , being a colour which blends well with other flower colours. It can be grown in a pot , where it relishes the free drainage, as long as it is kept watered. Dianthus 'Lemon Fizz' has flowers which produce a lovely clove like fragrance and the petals can be used in cooking or for decoration on salads or cakes.  | 4.90 |
| <b>Dierama pulcherrima-hybr<br/>'White' seeds - (Angels'<br/>Fishing Rod)</b> | These open pollinated seeds are from a plant which has graceful airy arching flower stems and bell shaped pure white flowers which resemble small dainty fishing rods. It is a compact form reaching approx 1.2 metre high when in flower. It is the perfect perennial for the summer garden, and it also looks good in containers. It looks its best when it has room to show off its graceful flowers, and is attractive when planted near water, but the corms must not get too wet over winter, so careful placing is required, once the seeds have grown to corms, if you are planting near water.<br>Dieramas like an open, sunny position in a fertile, loamy, moist, but well-drained, soil, which doesn't dry out in summer or become waterlogged in winter. Heavier clay soils and lighter sandy soils should be improved by incorporating well-rotted organic matter. Alternatively, dieramas do well in raised beds.<br>Dieramas pollinate easily with other species and varieties. This plant may produce seeds which have flowers other than white, although there are no other colours in the garden. | 4.9  |
| <b>Dierama dracomontanum<br/>seeds - (Angel's Fishing</b>                     | This is a dierama not often seen on the market. It has compact clumps of long thin mid green leaves, from which emerge long  | 5.9  |

|   |   |      |
|---|---|------|
| <b>Rod)</b>   | stems of deep pink flared flowers. The flowers are very large in proportion to the plant, and hang in abundant arches from the long stems. It makes a spectacular specimen plant and is very attractive near water .  |      |
| <b>Dierama pulcherrima 'Blackbird' seeds - ( Angel's fishing Rod)</b> | This dierama is the darkest of all dieramas. The seedlings produced may vary in colour , with some being lighter shades , but most should be claret purple . The flowers are produced on pendulous stems which resemble fishing rods and hence their common name.   | 5.10 |
| <b>Digitalis ambigua</b>  | This is the largest and most spectacular flowered of the yellow foxgloves. It is perennial and long lived. It thrives in partial shade and likes humous-rich well drained but moist soil. This digitalis has glossy green, veined leaves, whose flowering stem can reach a height of 70–120 cm (28–47 in). The pale yellow bell-shaped flowers are spaced out on the stem, 3–4 cm (1–2 in) long. The plant has spikes of chocolate netted, large sulphur yellow flowers over rosettes of strongly veined leaves are considered to be amongst the best of the yellow flowered foxgloves. It is the holder of the prestigious Award of Garden Merit from the Royal Horticultural Society. | 4.90 |
| <b>Digitalis ferruginea 'Gigantea Gelber Herold' seeds</b>            | This Digitalis has larger flowers whose yellow colouring is better than the species flower. It forms a tall pyramidal flower spike , which is extremely handsome especially if placed in groups at the back of the border . Butterflies and other beneficial pollinators love it. The flowers are produced profusely and they are long lasting. An excellent landscaping plant  | 4.9  |
| <b>Digitalis lanata 'Café crème'</b>                                  | This foxglove has small pearl grey flowers speckled with gold and brown. These merge with the grey to give a mocha cream colour, which is a very useful palette for the cut flower arranger as it blends well with other flowers. The flowers are produced on straight stiff stems and the plant itself produces many spikes in its second year from seed.  | 4.90 |

|   |   |      |
|---|---|------|
|   | Note : All parts of this plant and also the seeds are poisonous to animals and children.  |      |
| <b>Digitalis mertonensis 'Summer King'</b>                    | This attractive plant is a hybrid between Digitalis purpurea and Digitalis grandiflora, which has been awarded the Royal Horticultural Award of Garden merit. It has beautiful raspberry pink flowers which are a mix between the pink flowers of digitalis purpurea and the yellow flowers of digitalis grandiflora , and makes a lovely statement in the garden border.They are larger than the traditional foxglove flowers and appear in late spring and early summer. The plant itself is more compact than its parents, growing to about 1.2 m high. The plant likes dappled shade, and is an easy care plant. It makes a good cut flower and will produce its beautiful raspberry pink flowers reliably for you every year with little fuss. | 4.90 |
| <b>Digitalis parviflora seeds - (Milk chocolate foxglove)</b> | This is a very attractive foxglove, which, when out in flower invites comment from almost all who see it. The tall spires of small cylinder shaped chocolate coloured flowers are set off handsomely by the glossy dark green foliage. Digitalis parviflora will flower in its second year from seed.   | 4.9  |
| <b>Digitalis purpurea 'Apricot' seeds - ( Foxglove)</b>       | This soft most unusual apricot pink foxglove won the Award of Garden Merit from the Royal Horticultural Society. It has stately spires of flowers which are tubular in form, and lends height and interest to the garden, or in naturalised settings at the edge of woods. It tolerates sun or shade and can be used as a cut flower.   | 4.9  |
| <b>Digitalis purpurea 'Snow thimble' seeds</b>                | This is the first pure, snow-white flowering seed strain among foxgloves.<br>It has absolutely no lavender to purple spots that are so common among other seed strains.<br>It is a large flowering foxglove which makes an excellent cut flower and if you plant it in groups in your garden it will provide spots of accent amongst other coloured flowers. It is very easy to grow and can be sown at anytime of year. It can also be used as an excellent container plant.   | 4.9  |

|   |   |      |
|---|---|------|
| <b>Doryanthes excelsa</b>   | This plant is native to the Sydney area of Australia. It has handsome sword like leaves which are about 1 metre high , and it forms a stately plant . From the leaves arise long stems of bright red , trumpet shaped flowers which are held far above the foliage and can be up to 6m high. The flowers , of which there can be up to 100 in a spike , appear in the winter time, when there is little else in flower. The plant is a long lived perennial, and is a valuable addition to landscape plans, Being such a statuesque and attractive plant . As an added bonus it is drought and even fire resistant. | 4.90 |
| <b>Echinacea angustifolia seeds</b>   | This plant has pink daisy flowers which droop from an orange central disk. It is a useful garden plant being drought, heat and humidity tolerant and will also grow in poor soils. It makes an excellent container plant and cut flower and can also be dried if you dry it upright rather than hanging it downwards. Beneficial insects are attracted to its central disk. It is also used for medicinal purposes.   | 4.9  |
| <b>Echinacea pallida 'Hula Dancer' seeds - (Coneflower)</b>                     | This Echinacea has dramatically reflexed, very narrow white petals with a pink tinge. It is the only echinacea species with white pollen. It has thin upright unbranching stems. It makes an excellent cut flower and is drought resistant. Butterflies love it. If you plant it in the garden border it will always be admired for its unusual architectural form.   | 4.9  |
| <b>Echinacea paradoxa seeds - ( Bush's Purple Coneflower, Ozark Coneflower)</b> | Unlike one of its common names, 'Bush's Purple Coneflower', this plant's flowers are not purple. It has wonderful golden yellow flowers which are 10cm across, with dark cone heads, which sit well above the reed-like foliage and provide a dramatic feature in the garden. It is an extremely drought hardy plant, with a long taproot. It is also heat and humidity tolerant.<br>\nIt is best planted in mass to benefit from the showy blooms.<br>\nIt blooms abundantly from early summer to early autumn, making a spectacular display in the garden. Its flowers make extremely                             | 4.9  |

|   |   |      |
|---|---|------|
|   | <p>good cut flowers, and they can also be dried.</p> <p>An easy care , and rewarding plant for a dryish site and good for natural planting and wildflower gardens, as well as beds and borders. It can also be planted in containers, provided that the container is large enough for the long taproot.</p>   |      |
| <b>Echinacea Purpurea</b>                   | <p>Echinacea purpurea is a plant which has pretty purple rose coloured flowers on bushy stems to about 1 metre high. Bees and butterflies love it, and it is used medicinally as well. It is an excellent cut flower which can be cut fresh with the petals left on, or dried for its cones. It doesn't need very much care when you grow it .</p>  | 4.90 |
| <b>Echinacea purpurea 'Alba'</b>            | <p>Echinacea 'Alba' is the white form of echinacea purpurea. It has pretty white petals with beautiful contrasting centres which are a brownly orange. It makes an excellent cut flower coordinating with every colour of flower and foliage , as well as being a showy specimen for the garden. Here it will contrast with all flower colours, and perform well for you so long as it has plenty of sun. It flowers in the first year. Gardeners and home health people use it as a medicinal plant as well as for its beauty in the garden</p>                    | 4.90 |
| <b>Echinacea purpurea 'Magnus Superior'</b> | <p>This is an improved form of 'Magnus', which was the most popular purple coneflower of all time. It has darker blooms and stems and is a more consistent growth. From a tall mound of coarse dark-green leaves, large daisy flowers with magenta-pink petals surrounding an orange-brown central cone appear in summer.They are attractive to butterflies. If you remove old and spent flowers regularly the plant will bloom for longer. The seed heads are attractive in winter with frost on them and the flowers are excellent, long-lasting cut flowers.</p> | 4.90 |
| <b>Echinacea purpurea 'Rubinstern'</b>      | <p>This echinacea has brilliant intense dark pink blooms. Its petals are horizontal and it lasts well as a cut flower. It won the cut flower of the year award in 2006, and has won the prestigious award of</p>  | 4.90 |

|   |  |      |
|---|--|------|
|   | garden merit from the RHS.   |      |
| <b>Echium 'Blue Steeple' seeds</b>                        | Approx 12-24 months after it is sown, this plant produces spectacular spires of approx 3-4 m which have a myriad of small blue flowers , which the bees love. It will set seed if fortune favours the gardener, but the seed is not prolific.  | 4.90 |
| <b>Echium 'Pink Fountain' seeds - (Tower of jewels)</b>   | This is a very sought after cross of Echium pininiana and echium wildpretii, made by Plant World Gardens. The flower spire grows to approx 3-4 m high and is covered with pale pink flowers which act like a beacon for bees and other beneficial insects. These seeds were produced by open pollination, so they may not all be pink flowering, though most will be.                            | 5.80 |
| <b>Echium fastuosum seeds</b>                             | This echium grows to about 2m tall with flowers. It has pretty light blue to dark purple blue flowers which are very attractive to insects such as bees and butterflies.<br>It is a large shrubby plant , with a nice mounding habit, which lives for many years. It will grow with very little care and is quite hardy . It tolerates drought quite well and likes the soil to be well drained. | 5.9  |
| <b>Echium 'Snow Towers' seeds</b>                         | This echium is a stately 4.5 metres high and the flowers are white. These seeds are open pollinated and will throw mostly white flowered plants with the occasional other colour. To keep only white flowering ones keep only the small plants with pale green stems and discard plants with coloured stems.   | 5.70 |
| <b>Elsholtzia stauntonii seeds - ( Mint Shrub)</b>        | This plant is a small bush which belongs to the mint family. Its leaves have a minty scent when crushed. It bears lilac - purple flowers in panicles in autumn, and is drought tolerant, preferring well drained soil which are on the dry side. It makes a good cut flower.   | 4.9  |
| <b>Erigeron speciosus 'Pink Jewel' seeds - (Fleabane)</b> | This plant is a must have for the perennial flower garden. It is extremely easy to maintain and will perform well for you once it is established. It has bright pink flowers which are produced over a long time during the summer. They are excellent cut flowers, but also produce a great show during the summer in the garden. It  | 4.9  |

|   |   |      |
|---|---|------|
|   | <p>makes an excellent container plant. Their foliage is dark green and they form a bushy clump. If you remove the old flowers they will continue flowering for a long time.</p>   |      |
| <p><b>Eryngium giganteum 'Miss Wilmott's Ghost' seeds - (Giant Sea Holly)</b></p> | <p>This plant is spectacular, with unusual metallic silvery grey leaves, stems and flowers. It has a green cone in the centre of the flower. It shines in the garden, and reaches its peak in late summer, when all else is becoming untidy and faded. The flowers are excellent for cutting, fresh or dried.</p> <p>It has its name from the tale that English plantswoman Ellen Willmott used to secretly scatter seeds of this plant while visiting other peoples' gardens, since she liked the plant so much. In summer it produces large heads of lovely lime-green flowers with blue stamens backed by large and conspicuous bracts, the whole later developing a shining silvery hue.</p> <p>The "giganteum" refers to the flower heads which are large, and not to the plant which usually grows to approx 90 cm high. Prefers full sun in a light well-drained soil. Will tolerate very light shade. Plant into final position while the plant is young. The roots are often several feet long and do not like to be disturbed. Flower stems may be cut back after flowering but the seedheads are attractive and could be left over winter. Cut flowers before fully open if you wish to dry them. Divide in early spring or autumn, be gentle, the plant does not like root disturbance. It will need to be protected from winter wetness, and is drought tolerant once established. Will self-seed.</p> | 4.90 |
| <p><b>Erysimum cheiri 'Far lady Mix' seeds – ( Wallflower)</b></p>                | <p>This is a mix of mostly pastel and bi- colour shades. The plants all have honey scented flower spikes in spring. The stems and spikes are strong. This plant is excellent for knee- high spring borders and for cut flowers for spring posies. As a mass landscape plant it cannot be beaten, and the scent is divine.</p>   | 4.90 |
| <p><b>Filipendula ulmaria seeds - (Meadowsweet)</b></p>                           | <p>This plant likes damp soil and grows well alongside streams and in boggy areas, but will also grow in soil which retains some moisture.</p>  | 4.90 |

|   |  |      |
|---|--|------|
|   | <p>I has a long history of use as a medicinal plant stretching back to the druids in Britain and beyond that time.</p> <p>It is mostly grown for its very attractive lime green foliage which fades to gold in the summer sun. However the flowers are also very delicate and graceful , and almost frothy in appearance , and are sweetly scented . Some gardeners remove the flowers so that the foliage will remain luxuriant. The plant will grow in full sun or dappled shade.</p>  |      |
| <b>Fritillaria meleagris seeds</b>  | <p>This flower likes drained but damp soil in the sun or half shade, but does not like being dried out completely. The leaves are narrow, and grass-like and the flowers are beautiful, square-shouldered bells in pink, mauve and darker purples. They are lightly chequered on the outside . On the inside they are paler in colour, and are splashed with green.</p>  | 4.90 |
| <b>Fritillaria pudica seeds</b>   | <p>This small fritillaria has pretty yellow bell shaped flowers, which grows in dry or well drained soils . It is found in its native habitat in the Western USA. The bulb was used by the native americans as a food source.</p>  | 6.80 |
| <b>Gaillardia aristata 'Monarch large Flowered Mix ' seeds - (Blanket Flower)</b> | <p>This is an excellent mix of red gold and bronze flowered plants. They bloom from early summer to autumn attracting all of the beneficial insects., and flower in their first year from seed. Cut the dead heads for continuous bloom. They are drought resistant once they are well established , and make an excellent cut flower. They can also be used for large scale landscape planting.</p>   | 4.9  |
| <b>Gaillardia aristata 'Torchlight' seeds - (Blanket Flower)</b>                  | <p>This plant has large red flowers with a yellow border. The exterior edge of the flower has sharp pointed petal edges and almost could have been cut by pinking shears . It is an excellent plant for natural landscaping, and bees and butterflies love it. When his properly established it is drought tolerant and this makes it useful for xeriscaping. It flowers its heart out for a long period, and smothers itself with blooms. It requires very little care and is an easy plant in the garden, and also performs well in pots. It flowers</p> | 4.9  |

|  |   |      |
|--|---|------|
|  | in the first year from seed, about 4 months after germination.  |      |
| <b>Gaura lindheimeri 'The Bride' seeds</b>   | This is a lovely plant for adding airiness to the garden , as the delicate branches with their white to pale pink flowers sway in the slightest breeze and the bees absolutely love its flowers. It flowers for almost forever, well at least 5 months which is pretty good value. It flowers in the first year after sowing from seed about 4 months after germination, and is also a good cut flower. It is not too fussy where it will grow so long as the soil is well drained and it can tolerate some drought. For its many virtues it was awarded the RHS award of merit.  | 4.9  |
| <b>Gentiana triflora var japonica seeds</b>  | This gentian bears bright blue to light blue flowers which are bell shaped, in the axils of the strong vertical stems. It prefers a good humus rich soil in semi- shade and looks stunning in the garden . It is an extremely good cut flower , lasting very well in the vase.  | 4.90 |
| <b>Geranium sanguineum var striatum seeds 'Vision Light Pink'- (Bloody Cranesbil</b> | This is one of the small bushy mound forming types of geranium. It grows as a mound of fine-textured green foliage. In spring and summer it produces a mass of soft-pink flowers, which have deep pink veins. This geranium will withstand variations in climatic conditions, and for those of us who have humid conditions, it will cope well. It will create a nice bushy clump and serve as a good groundcover. Its leaves often turn a lovely bronzy-red in the autumn. It makes an excellent container plant.  | 7.8  |
| <b>Gerbera jamesonii F1-Hybrid 'T&amp; M Mixed ' seeds</b>                           | These F1- hybrid gerbera mix seeds make great indoor pot plants, and the large bloomed flowers are produced on strong sturdy stems. They can also be grown outdoors in sheltered warm locations in the north of the NI. This is a mix of double and single petalled flowers. Colour range is : reds dark and scarlet , through to cerise and rose pinks, salmons , yellows through to creams , and white . The gerbera F1 - hybrids grow quickly and make a very good pot plants and are easy to grow from seed. They will take dappled shade as well as their favourite sun. They have large flowers and make excellent cut flowers. | 4.90 |

|   |   |      |
|---|---|------|
| <b>Gloriosa superba seeds</b>                                   | This attractive plant has striking orange and yellow flowers, with slightly crinkled edges, which look a little like a large and brightly coloured butterfly. They are not very commonly grown plants, and always draw the eye with their exotic and unusual flower shape. The flowers are excellent cut, and last a long time in the vase. In the spring it sends up shoots from soft tubers, which like to cling to available supports and it will climb to a maximum of about 4m, though this depends on the location and soil that it is planted in. Its leaves have small tendrils on their ends to assist with climbing. All of the plant is poisonous to humans, and in particular the root. Plants should be given a liquid fertiliser every few weeks to promote good flowering. The seeds take a little patience to grow, often taking up to 4 months to germinate, and sometimes only about 50% will germinate. You won't get flowering plants for a few years, but if you are a patient gardener the wait is worth it | 5.50 |
| <b>Gompholobium scabrum</b>                                     | This Australian native is a small shrub to about 2 m high, and 1 m wide. It has lovely brightly coloured lilac pink to light purple flowers in August to November, when it is smothered with very lovely pea shaped flowers, amidst delicate foliage which is almost heather like. It makes a good cut flower. It is probably the most spectacular of the Fabaceae family and likes a well drained soil in full sun and is frost hardy. It is easy to grow from seed, and can be used to good effect as a container plant.  | 4.90 |
| <b>Goniolimon tartaricum seeds - (German Statice, Limonium)</b> | This plant produces an eye-catching display when in full flower. It produces masses of white or pink frilly flowers all summer long, which appear to be made of paper, they are so delicate. The blooms are extremely good as cut flowers, lasting for over 2 weeks as fresh cut flowers, and they are also used as dried flowers because they hold their colour well especially in winter flower arrangements.<br>The plant forms a low mound with broad green leaves which are a good textural ground cover. The flower stalks appear from the  | 4.9  |

|   |  |      |
|---|--|------|
|   | <p>foliage in summer, carrying light gossamer, branched panicles that grow 45cm tall. The panicles produce delicate, miniature tubular silvery-white or pink sprays of flowers with little rose-pink inner petals in mid summer.</p> <p>This plant is easy to grow from seed, is long lived and is very productive each year. It grows best in a well-drained site in full sun.</p>  |      |
| <b>Grevillea crithmifolia seeds</b>                                       | <p>This grevillea grows from 0.6 to 2m high. It can be used as a ground cover, suppressing weeds with its dense growth. In winter and spring it smothers itself with white coconut ice flowers which are scented. They attract all of the beneficial insects. It makes a lovely small growing bush as a feature plant in a garden. It can also be planted in a large pot to make an outstanding specimen plant. Grevillea crithmifolia needs well drained sandy soils and can tolerate coastal conditions. It doesn't need a great deal of care once established, and a light trim after flowering in spring is about all it requires.</p> <p>Approx. 10 seeds in packet</p> | 5.70 |
| <b>Gypsophila pacifica seeds – ( Pink Baby's Breath)</b>                  | <p>This is a pretty plant which has well branched stems with a myriad of tiny pale pink flowers. It makes a good cut flower with tall strong stems, and also is an excellent flower in the garden, adding a misty hazy effect which softens other plantings.</p>   | 4.90 |
| <b>Gypsophila paniculata fl. pl. 'Snow Flake' seeds - (Baby's breath)</b> | <p>This pretty plant produces clouds of dainty double (50%) or single white flowers in summer and autumn, in masses above a neat compact plant with blue green foliage. The flower branches reach 90 cm tall. It is used extensively in wedding bouquets and makes a great cut flower. It can also be dried for winter floral arrangements. It prefers moist well drained soil until established and then is drought tolerant. Trim back after blooming to promote vigorous new foliage. Cut back in the autumn for strong spring growth. it is an easy care plant which is hardy to grow.</p>   | 4.9  |
| <b>Hardenbergia violacea rosea ( Bush Form) - (</b>                       | <p>This plant has lovely large tresses of pink pea shaped flowers in abundance in early spring. This is the bush form of H. violacea</p>   | 4.90 |

|  |  |      |
|--|--|------|
| <b>Coral Pea)</b>  | rosea. It is a less vigorous climbing plant than other forms of hardenbergia , and will form a small upright shrub, rather than a climber or ground cover. It does well in most soils and climates, and can cope with light frosts, and does not overrun its position.   |      |
| <b>Helenium autumnale<br/>'Helena Red Shades' seeds<br/>- (Autumn Helenium)</b>      | This plant is a bright easy care perennial, which brings its bright flowers in the late summer when almost everything else in the garden has long finished, and is becoming tatty as it winds down for the autumn. Helenium "Helena Red Shades" flowers in the first year from seed. On well-branched, upright stems it produces many small round flowers in a rich spectrum of red, copper and brown shades. It is a very good performer in your garden and makes a great cut flower. It flowers in the first year from seed. | 4.9  |
| <b>Helenium puberulum<br/>'Autumn Lollipop' seeds- (Helen's Flower, Rosilla)</b>     | This plant has curious ball shaped heads in brown colours with a small yellow skirt of petals. It makes a decorative plant in the garden and is loved as a cut flower and is also prized for its drying abilities. It makes a good container plant. The flower heads are extremely attractive to bees and butterflies, and golfinches which love the seed. Plant in full sun to light shade , and in soil which gets regular moisture such as stream seeps , but it will also tolerate some drought.                           | 4.9  |
| <b>Helichrysum bracteatum<br/>'Apricot Peach mix' - (Strawflower)</b>                | These plants are tall and well branched, and don't need to be staked. They bear lovely double flowers in soft apricot peach shades which make great fresh cut flowers and they dry well also.  | 4.9  |
| <b>Helichrysum bracteatum<br/>'Antique white' seeds</b>                              | These plants are tall and well branched. They bear lovely double clear white flowers which make great fresh cut flowers and they dry well also.  | 4.90 |
| <b>Helichrysum bracteanthum<br/>'Salmon Rose' seeds - (Strawflower, Bracteantha)</b> | These plants are tall and well branched. They bear lovely double soft salmon rose flowers which make great fresh cut flowers and they dry well also.   | 4.9  |
| <b>Helichrysum bracteatum<br/>'Lemon Yellow' seeds - (Strawflower, Helichrysum)</b>  | These plants are tall and well branched. They bear lovely double soft lemon yellow flowers which make great fresh cut flowers and they dry well also.  | 4.9  |

|   |  |      |
|---|--|------|
| <b>Helichrysum bracteatum 'Fireball' - (Strawflower, Everlasting flower, Paper Daisy)</b> | This wonderful strawflower has large coppery red flowers on strong straight stems. It makes an excellent cut flower and dries well for floral arrangements, keeping its colour well.   | 4.9  |
| <b>Helichrysum bracteatum 'Scarlet' seeds - (Strawflower, Everlasting Daisy)</b>          | These deep red , shiny papery flowers are extremely easy to cultivate.<br>They are tall, and with their strong stems and dark green foliage they make extremely good cut and dried flowers. They last a very long time and keep their colour for a long time when dried.   | 4.9  |
| <b>Helichrysum bracteatum 'Summer Rainbow 'Mixed' seeds - (Strawflower)</b>               | This is a mix of cultivated varieties of Helichrysum . The plants range from hot reds and golds through shades of magenta, lavender, pink, and white. The plants are about 75 cm high, and are excellent for cutting and drying, as well as being great value in the garden.   | 4.9  |
| <b>Heliopsis helianthoides var. scabra 'Burning Hearts' seeds -(False Sunflower)</b>      | This attractive plant cultivar flowers the first year from seed. It flowers in mid to late summer when there is not much else around, and has large golden and red daisy like flowers on black stems above a large bushy plant with purple leaves. It is cold hardy and is attractive to butterflies and bees. It likes full sun and it flowers in the autumn of the first year from seed.   | 5.10 |
| <b>Heliopsis helianthoides var. scabra 'Bleeding Hearts' seeds -(False Sunflower)</b>     | Heliopsis 'Bleeding Hearts' has flowers which are brilliant fire- red when they first come out. They age to orange- red and then finally turn to bronze at the end of their life. the dark red to purple/black stems and leaves, make it a very attractive bush even when it is not out in flower. But you will love the flowers which are offset magically by the dark foliage attracting the eye, and making it a handsome garden plant. It flowers in its first year from seed, and is a reliable solid performer. To add to its desirability it makes an excellent cut flower. | 6.20 |
| <b>Helleborus orientalis 'Newest Hybrids Mix'</b>   | This is Jelitto seeds special blend of its newest hybrids. the flowers are single or semi double. There is a mixture of yellow, white, pink, red, and there are also some spotted and striped ones included in   | 7.80 |

|   |   |      |
|---|---|------|
|   | this mix. These plants flower in the spring and like a rich moist well drained soil in part shade to full shade. They will tolerate quite severe frost.   |      |
| <b>Helleborus orientalis -Hyb 'Double Ladies Mixed' seeds</b>           | This is a wonderful mix of double flowered plants in shades of whites, yellows, pinks, reds and purples. They make an excellent cut flower, and make a very attractive plant in the garden. Plant them in groups for maximum effect.<br><b>Note : 6 Seeds in packet</b>   | 8.50 |
| <b>Hesperis matronalis 'Purple' seeds- (Sweet Rocket, Dames Rocket)</b> | This is the purple form of sweet rocket.<br>These plants are biennial, but will self seed. In the first year, a low mound of green leaves is formed, and then in the following spring they produce lovely upright branching heads of fragrant phlox-like flowers. They make an excellent cut flower , and are attractive to butterflies and beneficial insects.   | 4.9  |
| <b>Hesperis matronalis 'White' seeds-(Sweet Rocket, Dames Rocket)</b>   | This is the white form of sweet rocket.<br>These plants are biennial, but will self seed. n the first year, a low mound of green leaves is formed, and then in the following spring they produce lovely upright branching heads of fragrant phlox-like flowers. They make an excellent cut flower , and are attractive to butterflies and beneficial insects.   | 4.9  |
| <b>Hibiscus moscheutos-hybr 'Disco Belle Mix'</b>                       | This pretty hibiscus has very attractive dinner plate sized flowers in reds, pinks and whites. The flowers usually have a central eye of dark red. If they are planted early enough in the season they can flower in the first year. The plant tolerates heat and humidity well, so long as the soil retains some moisture.<br>This variety is a more compact growing hibiscus than some, growing to about 60cm . It can look spectacular in a large pot , but must be kept watered.<br>Approx 10 seeds in packet | 6.20 |
| <b>Hovea acutifolia seeds -</b>   | This is a handsome shrub which grows to about 1.5 m. It has very  | 4.9  |

|---|---|------|
| <b>(Purple Pea Bush)</b>                              | attractive purple pea shaped flowers on long racemes in late winter and spring . It likes a well drained soil in sun or partial shade, and is tolerant to light frosts . It grows readily from seed.  |      |
| <b>Iberis umbellata 'Rose cardinal' – (Candytuft)</b> | This candytuft is a nice little plant for the front of borders where it will bloom its heart out for you if it is placed in full sun. It has rose pink , purple and white flowers , and its fragrance attracts beneficial insects. It can also be used as a non invasive ground cover. It can also be used as a cut flower for small posies, and looks very good in a pot.  | 4.90 |
| <b>Ipomoea quamoclit</b>                              | Ipomoea quamoclit is an annual climber which has bright red star shaped flowers above beautiful fine fern-like leaves. The plant flowers through summer and right into autumn until the first frosts. It is attractive to beneficial insects , and is a fast and vigorous grower , so can be used for hiding unsightly objects.   | 6.90 |
| <b>Iris spuria hybrids</b>                            | This iris has slender leaves and will grow into a clump of attractive grey-green spear shaped foliage. The flowers range from white through blue, purple, red and brown and many colour combinations between . Its flowers are usually held on long stems with several flowers to a stem. It makes an attractive garden subject and is easily maintained. The spuria irises like full sun to partial shade and will grow in well drained soil preferring those which are rich in humus. They are attractive to bees and butterflies.                        | 5.26 |
| <b>Isopogon dubius seeds</b>                          | Isopogon dubius is a native australian flower which grows into a small shrub about a metre high. It has large deep pink flowers in clusters which look a little like big pincushions being a bit spiky , and the leaves are stiff and spiky also. The plant is spectacular when in full flower, and the bees and butterflies love it. It likes full sun and dry summers, with very well drained soil. It can tolerate a little shade and also light frosts. The flowers are excellent cut, making a long lasting cut flower, and can be grown in pots as an | 4.90 |

|   |   |      |
|---|---|------|
|   | eye catching specimen, in a large pot.  |      |
| <b>Knautia macedonica 'Red Cherries' seeds - (Pincushion Flower, Scabiosa 'Red Knight')</b> | This plant has very bright cerise red pincushion like flowers, which is unusual in border perennials and has a long flowering season. It continues from late spring through autumn and even into early winter. It is one of the very best perennials for borders. It makes a nice neat rounded cushion of leaves and the flowers are held well above the greenery. The flowers are good for cutting. It is an undemanding plant to grow, and will gradually spread to form a good clump. It makes an excellent container plant. It is a very popular plant, and is attractive to beneficial insects including bees and butterflies. | 4.9  |
| <b>Lagurus ovatus seeds - (Bunny Tails, Hare's Tail)</b>                                    | This is an ornamental grass whose plumes commence as a greenish cream and then mature to a pinky buff brown colour. It is an annual grass, which looks good in border edgings and is especially loved as a cut flower, which dries very well and lasts for longer than other dried grasses.   | 4.9  |
| <b>Lathyrus odoratus 'Incense Mix'-( Sweet pea)</b>   | This is a special mix of the most fragrant varieties of Sweet Pea. The vine which climbs to about 3m produces lovely ruffled and also some non ruffled blooms. The flowers come in many pretty colours pink, cream, white with picotee, and lavender., which are excellent as a cut flower having long straight stems as well as being intensely perfumed.  | 4.90 |
| <b>Lathyrus oderatus 'Erewhon'</b>  | This sweet pea is the first sweet pea flower which has petals which are darker than its standards. It was bred by our great New Zealand Breeder Dr Keith Hammett. The petals are dark purple and the standards are a light pink. It is very fragrant, and is an excellent cut flower, as well as being an attractive annual climber. Sweet peas are easy to grow and make a great show in the garden. You need something for them to climb up, a wigwam made of 4 or 5 stakes tied together at the top works quite well, or a trellis or similar.   | 4.90 |
| <b>Lathyrus oderatus 'Hi</b>  | This sweet pea is the first sweet pea flower which has petals   | 4.90 |

|   |  |      |

You need something for them to climb up, a wigwam made of 4 or 5 stakes tied together at the top works quite well, or a trellis or similar.                              |      |
| <b>Lathyrus oderatus<br/>'Wiltshire Ripple'</b>   | This sweet pea is one of the Spencer series of sweet peas, which are late flowering sweet peas. The flowers have chocolate to cranberry streaks on the petals and this colour also outlines the petal edges throughout and lining the petal edges. They are very fragrant.   | 4.90 |
| <b>Lechenaultia biloba seeds</b>  | This is a small ground hugging australian plant which grows in well mannered clumps to about half a metre wide and about 30cm high. It has the most amazing bright blue flowers, which completely smother it in spring. The plant requires very well drained sandy soil in full sun to do well. It can withstand only a light frost. The best place to grow this small gem of a plant is in a pot in the full sun, or in a rockery, in sandy gravelly soil where it will get the good drainage that it requires. | 4.90 |
| <b>Leucanthemum x<br/>superbum fl pleno<br/>'Snowdrift' - (Crazy Daisy,<br/>Shasta daisy) seeds</b> | This shasta daisy has very finely cut petals which appear like a fringe around a yellow centre. they can be double or semi double and are long lasting. they make a good cut flower, and are indispensable in the summer border, being easy to grow from seed and flowering for a long time. It makes an excellent container plant.  | 4.9  |
| <b>Leucocoryne<br/>coquimbensis – ( Glory of<br/>the sun)</b>                                       | Leucocoryne coquimbensis is a bulbous plant which has beautiful fragrant flowers. They are blue or violet ( and sometimes white) at the edge of the petal, shading to white in the centre with yellow stamenoides. It makes a lovely long lasting cut flower ( grown in Holland to supply the cut flower industry), and is a pretty garden flower which is not often found in our gardens here.  | 7.80 |

|  |   |      |
|--|---|------|
|  | It is a winter growing plant, which should be grown in the full sun. It likes rich, well fertilised moist soil and coolish temperatures – about 10 – 18 deg C. It seems to do well when given a hot summer when it will be dormant.   |      |
| <b>Leucocoryne purpurea-<br/>(Purple Glory of the sun)</b>                 | Leucocoryne purpurea is one of the very beautiful leucocorynes. It has lovely purple flowers which have the fragrance of almonds. It is not very often seen in the garden , so you will have a flower which not many others know about . It grows during the winter , flowering in the early spring and dying down over the summer. It likes a cool moist growing period , in full sun , with ideal temps of 4-12 deg C, and hot dry summers, so it will grow well in southern areas of New Zealand. It makes a long lasting and excellent cut flower, and looks great in the garden.   | 9.50 |
| <b>Liatris pycnostachya</b>  | This liatris is an upright, clump-forming, perennial. It has rounded, fluffy, lavender flower heads in summer, which are massed on long spikes above thickly-leaved, rigid flower stalks. It is the tallest of the liatris species growing to 1.5m with flower spikes . Flowers generally open top to bottom on the spikes, which is an unusual feature of liatris. The flowers are excellent in the vase, and if cut when the top only is open the flowers will continue opening day by day. Cut off the top flowers as they die. It is an easy care plant which does best in rich well drained soil but can also be grown in average, dry to medium, well-drained soils in full sun. It is tolerant of poor soils, drought, summer heat and humidity, however it does not like wet soils in winter, so be sure to plant in well drained soil. It is loved by is an butterflies, bees and other pollinators, which are attracted to its nectar, and the birds love the seeds in the autumn. Small birds will visit the spikes in late autumn or early winter to eat the seeds.It makes an excellent container plant. | 4.90 |
| <b>Libertia chilensis ( grandiflora) - (Tukauki, Mikoikoi, New Zealand</b> | This plant has very beautiful clear white satiny flowers, which appear in spring and early summer. It forms a clump of dark green sword shaped leaves , from which arise the lovely white orchid-like   | 4.9  |

|  |  |      |
|--|--|------|
| <b>Satin Flower)</b>                                   | pristine white flowers . It is very hardy, does well in average soil conditions , and also can stand some drought, and cold weather. It also does well on the south side of the house, in the shade of the house so long as it is in a light area , where it will light up the garden as white flowers do in the darker parts of the garden . It has won the RHS award of merit and can also be used as a container plant. |      |
| <b>Lium duchartrei</b>                                 | This turks cap type lily has white petals with dark red spots, and lightly scented flowers. It flowers in summer and produces about 7 flowers per stem. It likes a cool partly shaded spot with moist soil   | 6.20 |
| <b>Lilium Kesselringianum</b>                          | This lovely lily from the Caucasus and Turkey has pale yellow to dark yellow bell or sometimes tubular shaped flowers which are fragrant, and flowers in mid summer. The flowers are spotted inside the bells, and the petals reflex somewhat at the tips. It makes an excellent, and unusual cut flower.  | 5.90 |
| <b>Lilium mackliniae Naga Form</b>                     | This lovely lily which has won the RHS award of garden Merit, has large deep rose pink flowers . It grows to about 80 cm and flowers in summer. It will increase by making small bulbs each year and gradually a small clump of the plants will form.  | 5.20 |
| <b>Lilium martagon-hybr 'Painted ladies'</b>           | These lovely little lilies come in an attractive range of colours :yellow, apricot, pink, wine-red, orange, and white blooms, and there are often purple spotted variations amongst these colours. They do best in well drained humus rich soil and prefer part shade.   | 7.40 |
| <b>Lilium monadelphum</b>                              | Lilium monadelphum is the easiest lily from crimea and the caucasus to grow. It grows in the leaf mould of beech forests in the Northern Caucasus regions of Russia It has large perfumed bell shaped, straw coloured to buttery yellow flowers with purple spots inside the flowers, on strong stems. It likes deep well drained soils . Add a little lime every year to allow it to flourish, and do not move it once    | 4.90 |
| <b>Limonium bellidifolium 'Dazzling Blue ' seeds -</b> | This plant flowers the first year from seed, about 5 months after germination. It has tall branching panicles of airy small  | 4.9  |

|  |   |     |
|--|---|-----|
| <b>(Statice, Limonium Caspium, Spangle)</b>                                | <p>blue flowers which float above a mound of large flat leaves. Like all limoniums the flowers are great for cutting and drying. Deadhead to prolong the flowering display. It fits in well with other border plants and lends a lightness to the flower display. It likes full sun and ordinary soil which is on the dry side and well drained</p> <p>It is hardy and requires very little maintenance. Plants which are already growing well can be divided in spring. It makes an excellent container plant.</p>   |     |
| <b>Limonium bellidifolium 'Caspia Sea Mist' - ( Statice, Sea lavender)</b> | <p>This plant has lovely light airy panicles of tiny blue flowers surrounded by more prominent white calices up to 90cm. It makes an excellent cut flower, as a light frothy filler for bouquets, but is a very good garden plant as well. It flowers in its first year from seed, about 5 months from germination, and will eventually form a round green-grey leaved clump.</p>   | 4.9 |
| <b>Limonium gmelinii ssp hungaricum seeds - (Perennial Statice)</b>        | <p>This plant has tall arching sprays of lilac-blue flowers which are excellent as a cut flower. It blooms over the summer months, and likes a well drained, even sandy soil in full sun. The plant forms a small rosette of green leaves, which is a neat tidy mound, from which the flower stems emerge. It can tolerate drought well and is a useful pretty plant for the garden</p>   | 4.9 |
| <b>Limonium latifolium seeds - (Sea Lavender)</b>                          | <p>Limonium latifolium is a very popular plant . It has a large profusion of dainty lavender- blue flowers which are held in panicles in mid to late summer. Plants will produce a number of stems, and the overall effect is billowing and delicate. The flowers are attractive to butterfliesThe foliage is borne in a low mound and the leaves are leathery. The plant does not like being disturbed, so divide or lift only when really necessary.</p> <p>The plant likes ordinary soil which is well drained and slightly on the dry side. It is an easy care plant. Once established the plant is very tolerant of hot dry spots.</p> <p>Deadhead the flowers to encourage further flower production.</p> | 4.9 |

|   |  |      |
|---|--|------|
|   | It makes a lovely dried flower. To dry, stems should be cut just as the flowers begin to open, and hung upside down in a warm, dark place.   |      |
| <b>Limonium perezii 'Deep blue select' seeds - (Sea Lavender, Statice)</b>                | This plant produces large clusters of flowers with dark purple-blue calyces and white corollas which are held well above the large rounded mid green leaves, and produce a great show in seaside gardens where they will grow well, coming from the canary islands as they do. They will produce flowers for most of the year and last well in the vase. They will withstand light frosts but should be sheltered from any extreme temperatures. | 4.9  |
| <b>Limonium sinuatum 'QIS Apricot ' seeds - ( Annual statice, Wavy leaf Sea Lavender)</b> | This statice mix produces flowers in shades of apricot The QIS range has very uniform plant height and flowering time. The flower clusters are approx 7cm and are produced on strong stems .   | 4.9  |
| <b>Limonium sinuatum 'Sunburst Pale Blue ' seeds</b>                                      | This pretty pale blue statice is especially good as a cut and also a dried flower. It is a good garden plant as well and the colour goes with most colour schemes.   | 4.9  |
| <b>Limonium sinuatum 'QIS Rose - ( Annual Statice)</b>                                    | This statice produces rose coloured flowers which blend well with most soft colours. The QIS range has very uniform plant height and flowering time. The flower clusters are approx 7cm and are produced on strong stems .   | 4.9  |
| <b>Limonium sinuatum 'Sunburst White' seeds - ( Annual Statice)</b>                       | This statice produces pure white flowers which mix well with most colours. The QIS range has very uniform plant height and flowering time. The flower clusters are approx 7cm and are produced on strong stems .   | 4.9  |
| <b>Linaria purpurea 'Canon Went' seeds -(Toadflax)</b>                                    | This lovely old fashioned plant has pretty pink snapdragon shaped flowers on a compact bush with slightly grey green leaves. It is an excellent cut flower. It is usually a short lived perennial, but will gently self seed for you if it likes the position you have found for it. Once it has become established it can withstand some drought. It will bloom for an extended period in cooler temperatures.                                  | 4.9  |
| <b>Linaria trinorthophora</b>   | Linaria triornithophora seeds produce a wonderfully different, fun   | 4.90 |

|   |   |      |
|---|---|------|
| <b>seeds –( three birds flying)</b>     | <p>plant for all of you people who are looking for something a bit different. This plant has purple flowers with bright yellow lips, which are produced in sets of three on a stem. They are for all the world like 3 small colourful birds , perhaps budgies, perching on a stem and discussing world affairs. It is a charming small plant which is long lasting and holds its colour well in the heat of summer.</p> <p>Linaria triornithophora seeds are easy to germinate and the plant makes an excellent cut flower, and will self seed for you , if conditions suit it.</p> |      |
| <b>Linum narbonense</b>                 | <p>Linum narbonense has particularly large beautiful blue flowers, which the plant produces for several months . gardeners consider it to be one of the best linums for the garden. It forms mounds of dark green spear-shaped leaves. It is a longer lived variety than other linums and forms a compact bush when in flower, and does not sprawl as much in the garden. Linum likes well drained soil , in a sunny position a little on the dry side, and is good in xeriscaped gardens .</p>   | 6.00 |
| <b>Lophospermum erubescens</b>          | <p>is a very fast growing vine to about 5m. It is perennial in warmer northern areas , but probably will not survive the winter in Southern areas where it will be cut back by the frosts, unless its roots are protected. These seeds will produce a variety of trumpet shapes , mostly they will be dark red. They will flower until the first frosts cut them back. If you grow them in colder southern areas, then put the roots in a large pot and cover them for the winter. They do well in hanging baskets .,</p>   | 4.90 |
| <b>Lunaria annua seeds - ( Honesty)</b> | <p>These seeds are open pollinated from our garden, where we only have the very attractive white flowered form of the plant, which bears its pretty flowers above mid green foliage. However as the bees are extremely industrious around these plants and love their flowers, it is possible that you may get the occasional purple form as well if the bees have found this in another Honesty lovers garden close by.</p>  | 4.9  |

|  |  |      |
|--|--|------|
|  | It is easily grown from seed , grows in partial shade quite well, and provides a pretty display in the garden. But the prime reason for growing this plant is the beautiful mother-of pearl seed cases which make absolutely outstanding decorative floral displays, once the seeds have fallen.   |      |
| <b>Lupinus perennis-hybr<br/>'Lulu Mix'</b>                    | This is a compact lupin, which grows to about 45 cm. It is an excellent plant for the garden flowering over the summer months, and dying down over winter to re-emerge in spring. It makes an excellent cut flower, and flowers in the first year from seed. The flowers come in a wide range including red, orange, yellow, purple and white and some bi-colours as well.   | 5.50 |
| <b>Lychnis chalcedonica</b>                                    | This is a very popular hardy and easy to grow perennial cottage border plant, which flowers the first year from seed if sown under cover in early spring. The plant bears large clusters of 5-10 cm fiery scarlet-orange flowers on tallish stalks in summer, above attractive bright green leaves. it is a good cut flower, and is an easy care, long lived plant. It can be divided quite easily in spring or autumn. It is attractive to butterflies and bees. It has won the award of Garden Merit from the RHS.   | 4.90 |
| <b>Lysimachia clethroides</b>                                  | This is a strong growing plant with very graceful arched white flower stems . It is the recipient of the Award of Garden Merit from the RHS. Florists love its flowers for their pretty shape and lasting ability. It is used to provide a fast spreading cover, and looks spectacular in the wild garden in drifts. and at the edge of streams and in bog gardens It grows well in full sun in moist humus rich soil and can become a weed if not controlled, as it grows quickly by underground stems . To control it grow in dry soil and light shade where it will spread more slowly. | 4.90 |
| <b>Macleaya microcarpa<br/>seeds - ( Pink plume<br/>poppy)</b> | This plant is a large handsome plant which has grey green leaves and dusky pink to buff flowers. It likes full sun but will tolerate partial shade. The flowers are good for cutting and is used in floral   | 4.9  |

|  |  |      |
|--|--|------|
|  | arrangements, and bouquets. It is a vigorous grower, so plant somewhere where it can be contained .  |      |
| <b>Malva moschata var alba cold treated</b>                      | This is the beautiful pure white strain of the musk mallow. It is a very lovely plant and for its outstanding features it was awarded the RHS 'Award of Garden merit". It grows to about 50cm and smothers itself in lovely large white saucer-shaped flowers. It makes an excellent cut flower , and will grow in most soils , even those which are on the dry side   | 4.90 |
| <b>Matthiola fruticulosa 'Alba' seeds- ( Perennial Stock)</b>    | <p>This plant, which is now hard to find, is a lovely filler for the garden border, requiring no care at all and rewarding each year with a prolific display of scented white flowers. It is particularly nice near an entrance way where its scent will waft indoors. It grows to about 70cm and forms a rounded clump of attractive soft blue grey felted leaves, from which arise, in the second year of growth, wonderful sprays of scented white flowers in spring and summer. It tolerates a moderate degree of drought and also some cold. Deadhead to maintain flowers and vigour. The plant will last for 3-4 years, before becoming woody, by which time you will need to replace it from the odd plants which have self seeded in your garden.</p> <p>\n</p> <p>\n&lt;strong&gt;Sowing advice&lt;/strong&gt;</p> <p>\nSurface sow onto the top of well drained seed raising mix or alternatively direct where they are to grow in spring. These seeds need light to germinate. Optimum germination temperature is 15-18 deg C. Keep watered, and plant out when large enough.The seeds usually germinate in 10-14 days.</p> | 4.9  |
| <b>Matthiola incana 'Quartet rainbow' seeds - (Annual Stock)</b> | This is an early flowering branching stock variety. It is a wonderful cut flower with all of the style and scent you may wish for. The flowers have cream yellow centres with a touch of rose on the outer petal edges and they have a wonderful clove scent. Stems are approx 60cm long. Approx 55 % are likely to be double with the rest single to semi double. You can select for doubles by following   | 4.9  |

|   |  |      |
|---|--|------|
|   | the sowing advice below. The plant should be pinched to produce a good flower spray form.  |      |
| <b>Matthiola incana ‘Vicky’s Vintage Violet’</b>                      | This stock seed produces a mixture of violet and lavender flowers, and its likely it will remind you of your grandmother’s garden and the scented flowers that it contained. It makes a lovely fragrant garden flower and will also cut well for the home. You will get about 30% singles germinating from this mix.   | 4.90 |
| <b>Melanoselinum decipiens seeds – (Madeiran Giant Black Parsley)</b> | Melanoselinum decipiens is a plant from madeira, which grows to a large size and is extremely sought after and handsome . It bears very large sprays of bright pink flowers, and the sprays can be up to 60 cm wide .The stems are bronze tinged when they first sprout , in the second year from seed, and the leaves are finely divided. The plant is very attractive even without the flowers, but altogether the flowers make it a very handsome specimen indeed. The plant may flower in its second year, but it may wait for a few years before it flowers. The plant will die after flowering, but if you leave a flower head to ripen it will self seed for you. | 5.90 |
| <b>Mirabilis jalapa ‘Marvellous Marbles Mix’</b>                      | This plant has lovely harlequin flowers which open in the late summer afternoon and its scented flowers perfume the air , displaying themselves in rainbow colours, striped veined and bicoloured in yellows reds oranges pinks and white. It is a great garden filler , and excellent planted near paths where the late afternoon and evening fragrance can be savoured by passers-by. They keep flowering from the late afternoon through the night until the morning.   | 4.90 |
| <b>Mirabilis jalapa ‘Salmon Sunset’</b>                               | Mirabilis ‘Salmon Sunset’ has lovely salmon pink flowers which open in the late morning . It forms a nice bushy plant , which will flower for you right up until the first frost. In Northern regions it will perform as a perennial, dying down over winter and springing away in the spring. In the rest of the island it is best treated as an annual. They keep flowering from the late morning through the night until the next morning.  | 4.90 |

|   |  |      |
|---|--|------|
| <b>Miscanthus sinensis 'New hybrids' seeds - (Chinese Silver Grass)</b> | This series has new species crosses among this genus of dense, fine bladed grasses. Colours range from rose to copper and tan with many shades in between. Quite distinct and not found in the usual types which tend to silvery spikes. These grasses can be used for landscaping and also for cutflowers. It makes an excellent container plant in a large container.  | 4.9  |
| <b>Molinia caerulea ssp caerulea</b>                                    | This is a tall attractive ornamental grass with an open habit which has very slender arching branches which bear very airy delicate flowers in summer. The stems are a bluish green. It makes an excellent large specimen container plant. The plant is attractive in all of the seasons and works well in a naturalised setting as well as in a border where its clumps of slightly weeping stems will combine well with any perennial.   | 4.90 |
| <b>Mutisia ilicifolia</b>   | This is a rarely offered climbing plant to about 3m with slim stems which produces large mauve-pink long petalled flowers. The plant flowers in summer and on into autumn. It has small soft holly like leaves which are finely toothed and have a tendril on the end of them. It is a native of Chile<br>5 seeds in packet  | 7.30 |
| <b>Myrrhus oderata</b>  | This is a herb and a very nice border plant where its frothy white flowers harmonise well with other plants. As a herb it used in salads where its young leaves and seeds give an aniseed flavour. All parts of the plant are edible, stalks can be used as celery, leaves can be cooked, and roots can be eaten. And the flowers are rich producers of nectar for the bees and beneficial insects and if grown in a garden will attract them to your area. The plant should be planted in partial shade, and does not like hot climates, growing best in cooler areas | 7.40 |
| <b>Nepeta nervosa 'Pink Cat' seeds - ( Catmint)</b>                     | This nepeta won the fleuroselect prize. It has dense aromatic flower spikes of bright pink. It is drought and heat tolerant, and flowers from mid summer for a long time in the garden. It forms bushy mounds of pink flowers and can be grown in containers too.  | 4.9  |

|   |  |      |
|---|--|------|
|   | It flowers in the first year from seed, if sown in early spring under cover.   |      |
| <b>Nepeta nervosa – ( Blue Moon)</b>  | From a dense, low clump of narrow grey-green leaves, appear spikes of rich blue flowers in midsummer. This plant is excellent for cutting, and the flowers are also attractive to butterflies. They are good at the front of the border and can also be used in pots. Divide the plants in early spring, and removing spent flowers regularly will encourage more buds to form. It flowers in the first year from seed, from midsummer onwards if sown in early spring under cover . | 4.90 |
| <b>Nicotiana knightiana seeds - (Tobacco Flower)</b>                        | A tall graceful annual plant which adds architectural form to your garden. It has small tubular flowers which are like pale apple green velvet. It can be used in a tub or pot as well as in the garden. It is quite hardy, and will grow in sun or light shade so long as it is kept moist. It is a good cut flower and will flower 14 -16 weeks after planting   | 4.9  |
| <b>Nigella damascena 'Miss Jekyll double Mix' seeds - ( Love-in-a-mist)</b> | Nigella damascena 'Miss Jekyll Double mix' seeds is a mix of all of the lovely colours available for Nigella in pinks whites, blues and indigo. the flowers are all double petalled. They make excellent cut flowers, and are easily grown , hardy flowers for the garden. As a bonus all of the seed heads are decorative and can be used for dried flower arrangements.  | 4.9  |
| <b>Nigella damascena 'Miss Jekyll Light Blue' ' - ( Love-in-a-mist)</b>     | This nigella. is the pretty light blue flower which everyone associates with Love-in-a-mist. It is an excellent cut flower and the seed pods are great for dried flower arrangements. It makes a very good garden flower, being easy to cultivate and requiring very little care and attention.  | 4.90 |
| <b>Nigella damascena 'Miss Jekyll Indigo' seeds- (Love-in-a-mist)</b>       | Nigella 'Miss Jekyll Indigo' – has deep blue flowers which are great for picking and make an easy care garden flower. The seed pods are very decorative as well and can be used in dried flower arrangements.<br>Nigella are an easily grown , no fuss flower which have been  | 4.9  |

|   |   |      |
|---|---|------|
|   | growing in gardens for centuries, prized by their gardeners for their simple beauty , and have been used throughout the ages for their medicinal properties<br>Nigella ‘Miss Jekyll indigo’ prefers a soil which is moist and rich in full sun.   |      |
| <b>Nigella damascena 'Miss Jekyll Rose' seeds - (Love-in-a-mist)</b>  | This pretty easily grown love-in-a-mist has very attractive rose pink flowers and the seed pods are a plum colour making an unusual addition for dried flower arrangements.   | 4.9  |
| <b>Nigella damascena 'Miss Jekyll White' seeds - (Love-in-a-mist)</b> | This is a lovely classic semi double white love-in-a-mist which everyone loves. They make a great cut flower and will dry well for dried arrangements   | 4.9  |
| <b>Nigella papillosa ‘Delft Blue’</b>                                 | This nigella has flowers with petals which have dark blue to purple splashes with greyish hints. The centres and stamens are a deep purple- black , and the foliage has a fern- like texture, making the whole flower very attractive and easy to blend in bouquets. The seeds are easy to grow and you can use this nigella in drifts in your garden to great effect. Dry the pods to use them to great effect in dried arrangements.  | 4.90 |
| <b>Nigella papillosa ‘African Bride’</b>                              | This nigella has striking flowers with black stamens which stand well above the shining white petals. It is a lovely addition to bouquets and lasts well. An added bonus is the seed heads which are attractive dried.  |      |
| <b>Ocimum basilicum 'Aromatto' seeds - ( Basil)</b>                   | This tall basil was raised for use as a cut flower . It has aromatic leaves, with hints of liquorice and mint, and can be used as foliage or as a cut flower for its brilliant purple flowers. It has attractive purple stems and glossy two toned plum and purple leaves which have purple veins. Its sweet spicy leaves can also be used as a traditional basil in cooking. If you are using it as a cut flower , harvest when the flowers have begun to form and the stems become stiff. Cut in the cool of the evening to prevent the stems from wilting. | 4.9  |
| <b>Oenothera versicolour</b>  | This is a very handsome evening primrose whose cup shaped   | 4.90 |

|--|--|-----|
| <b>'Sunset Boulevard'</b>  | flowers open tangerine and change through rose pink shades as it ages during the day. It makes a great border plant , which is bushy and has strong upstanding flower stems. It can be grown as an annual in colder areas. It should not be grown in soil which is too rich , as it prefers soil which is lean. It can tolerate some drought and likes a sunny position. It flowers in the first year from seed, about 3 months after germination  |     |
| <b>Omphalodes linifolia seeds - (Argentine forget-me-not)</b>                        | This is a dainty, charming little plant with grey-green leaves. It produces sprays of faintly sweet-scented, pure white flowers with golden eyes (that are excellent for cutting) in great profusion for most of the summer.<br>It will gently self seed, but does not ever become a nuisance. It will tolerate full sun or partial shade, and is also drought tolerant, but prefers a moderately fertile well-drained soil in full sun. Pinch out growing tips to encourage bushier growth. Water infrequently but well.<br>It is best when planted in groups so that the full effect of the fluffy white flowers can be appreciated. | 4.9 |
| <b>Orlaya grandiflora 'White Lace' seeds - (Minoan Lace, White Finch ,Lacflower)</b> | Orlaya grandiflora 'White Lace' is a hardy annual which has lovely pure white flowers that form in large, flat-topped clusters which look somewhat like a lace-cap hydrangea's flower. Each small central flower is surrounded by a circle of larger flowers. The flowers are borne in mid summer, and last through to the first frost. They are complemented by the filigree like ferny foliage. They create a lacy effect in the summer border and make an excellent cut flower.<br>White Lace grows to a height of around 60 to 70cm the large flower heads grow to around 8cm across and the flowers complement others in the .    | 4.9 |
| <b>Oxypetalum coeruleum 'Heavenly Blue' seeds - ( Tweedia)</b>                       | This plant was bred for the cut flower trade but is also a very good garden plant. It has sprays of sky blue flowers, a colour that is rare in the garden. It requires a minimum of 5 deg C to grow. Pinch out   | 4.9 |

|   |   |      |

|   | the stem when young to encourage a bushy habit. It makes an excellent container plant, and it flowers in the first year from seed, about 4.5 months from germination.   |      |
| <b>Papaver orientale-hybrid 'Pizzicato' seeds - (Oriental Poppy)</b>              | Pizzicato is a new semi-dwarf strain of oriental poppy. It produces flowers in a mixture of red, scarlet, orange, salmon, mauve, pink and white flowers. Its flowers are produced above lush foliage on strong stems to a height of 50 - 60 cm, and they are strong enough to withstand quite a strong wind. The flowers are large with a diameter of 15 - 20 cm. Pizzicato won the Fleuroselect prize The strong, 50 cm tall stems can even resist heavy winds. It produces up to 20 superb flowers on very uniform plants. It is easily grown from seed. It can also be grown in pots | 4.9  |
| <b>Papaver orientale-hybrid 'Coral Reef' – (Papaver Princess Victoria Louise)</b> | Papaver 'Coral Reef' has large double silken crepe-paper like flowers of a soft salmon pink, with a dark purple eye . Some gardeners consider it to be the most spectacular of the Oriental poppies. It flowers each year in the early summer. The plant likes cool winters and summers , and will perform best in the colder areas of New Zealand, where it will produce long stemmed flowers in abundance. However , it will also grow in the northern warmer areas, but the flowers will be produced on much shorter stems, and the plant may be somewhat shorter lived .            |      |
| <b>Papaver orientale-hybrid 'Royal Wedding' – (Checkers)</b>                      | This plant is a stunning addition to the garden, and will also grow in pots. It has large pure white satiny flowers with a striking dark eye at the centre. It makes a good cut flower if it is cut just before the bud begins to open. It is a larger growing variety.   | 4.90 |
| <b>Papaver rhaeticum</b>  | This very pretty perennial poppy has golden yellow or rarely light orange flowers. They are a small plant which are best suited to your special plants plot or rockery garden. They have blue grey leaves which are slightly hairy.   | 4.90 |
| <b>Papaver Rhoëas 'Amazing Grey'</b>  | This poppy is a very beautiful one. The flowers can be in a colour palette of very beautiful pearl grey, slate blue, or misty mauve with the occasional flush of dusky pink. Its flowers are very delicate and  | 4.90 |

|  |   |      |
|--|---|------|
|  | its shimmering ruffled petals catch the light like artificial crepe-paper blooms. It is easily grown. Most will flower in the first year from sowing.   |      |
| <b>Papaver rhoeas 'Coral Clouds'</b>                         | This pretty poppy mix has beautiful ruffled double pink, coral and white powder puff clouds of flowers which are taller than the normal rhoeas poppy being about 80cm when in full flower. Plant it along your garden walk for a romantic effect when you walk through them, or plant in splashes of colour to produce a watercolour effect. Cut the flowers when in bud and just beginning to open, for a delicate and lovely cut flower which will last for about 7 days.   | 4.90 |
| <b>Papaver somniferum 'Sunlit Silk mix' seeds - (Poppy)</b>  | This is a mixture of all of the wonderful, old fashioned poppies which would have been grown in old cottage and monastery gardens many hundreds of years ago, and indeed were often grown in our grandmothers gardens as well, not so long ago . You will get doubles and a small percentage of singles in pinks , purples, mauves like the one in the picture , burgundy, reds to dark red Black and whites and many colours in between. It is an easily grown plant and one that you really can't go past if you have memories of a garden long ago where there were many abundant flowers, and amongst them , bloomed these lovely ephemeral beauties. | 4.9  |
| <b>Papaver somniferum 'Flagship Orange' seeds - (Poppy )</b> | This beautiful poppy, the Owairaka Seeds flagship flower, which we have had for many years, is a brilliant clear sunset orange, the harbinger of warmth to come ,starting its flowering in the lovely clear, cool, early summer mornings and brings the promise of all of the beauty of the New Zealand summer's day, no matter where you may live.<br>It produces many beautiful clear orange blooms which appear in early summer and continue through into summer. Its abundant leaves are a healthy , smooth grey green, and they are slightly different in form from other somniferums, and the plant   | 4.9  |

|  |  |      |
|--|--|------|
|  | <p>seems to be a bit more resistant to poppy fungus which attacks some of the other somniferums. There is a possibility that this poppy is a cross between somniferum and another unknown poppy. It is best treated as an annual though has been known to survive Auckland winters.</p> <p>As with all somniferums it produces abundant seed, and left to self seed, you will get a series of flowering plants throughout the summer and on into the late autumn - at least in northern areas of New Zealand.</p> <p>If you are an admirer of poppies, this one is one of the plants that you will love, and must have, and you will not be able to find another poppy which is as beautiful nor as easy care as this one.</p> |      |
| <b>Papaver somniferum var paeoniflorum 'Paeony Double Black'</b> | <p>Papaver 'Paeony Double Black' has very deep red almost black silken velvet fully double flowers. It is an easily grown plant from seed and looks stunning in the garden. Its seed pods make terrific additions to your dried arrangements. Plant it in drifts to make a statement in your border. This is one of the plants which has been propagated by plants people through the ages in their gardens and is one that you really can't go past to bring bygone memories of beauty and elegance to your garden</p>  | 4.90 |
| <b>Penstemon whippleanus cold treated</b>                        | <p>Penstemon whippleanus is a mat forming plant which has wonderful dark purple to dark blue flowers in spring and summer. It makes a good container plant as well as performing well in the garden. These seeds are already cold treated so you don't need to stratify them.</p>  | 4.90 |
| <b>Phlomis russeliana seeds - ( Jerusalem Sage)</b>              | <p>Phlomis Russeliana is a popular plant due to its long flowering season. It produces, at intervals, long stems of soft yellow whorled flowers from late spring into autumn, above lush and dramatic heart shaped green leaves. Each plant forms an architectural candelabra-like effect in the garden, and as a bonus in autumn the flowers turn to handsome seed heads, which add drama to the autumn garden.</p>   | 4.9  |

|  |  |     |
|--|--|-----|
|  | <p>Although appearing ethereal and tender, this plant is a hardy specimen to about - 15 degrees C. and the beautiful leaf rosettes are evergreen over winter.</p> <p>In addition, Phlomis Russeliana is drought hardy and is an excellent plant for dry partial shade or a dry site in full sun. It tolerates poor, dry soil extremely well.</p> <p>It requires very little maintenance. When the foliage becomes untidy, from late summer onward, it may be cut back to encourage new growth. If left alone some people enjoy the form of this plant, especially during the snow when it appears as white fluffy snow covered balls raised on their stalks. It is a valuable and easy-to-grow plant and attracts bees and other nectar loving insects during its flowering period.</p> <p>To extend flowering, deadhead the spent flowers, this also makes for a tidier-looking plant.</p> <p>Large clumps should be divided every three years in autumn-winter to remove excess growth.</p> <p>Can be planted in a container, but this should be quite a large one , and don't make the soil too rich.</p> <p>The Royal Horticultural Society awarded the prestigious Award of Garden Merit (AGM) to Phlomis russeliana in 1993.</p> |     |
| <p><b>Phlomis tuberosa 'Bronze Flamingo' seeds - ( Jerusalem Sage)</b></p> | <p>Phlomis tuberosa 'Bronze Flamingo' produces abundant lavender pink hooded flowers, which are borne on dark burgundy stems. The plant lends an architectural quality to the garden and blooms from late spring through summer. It is hardy in most parts of New Zealand, and if you live in an area which gets frost or snow then you will be delighted with the striking sight of hoar frost on the seed heads. The dried seed heads make good additions to a floral arrangement.</p> <p>It likes full sun with well drained fertile soil and medium moisture, but can also tolerate some drought and thus is useful in dry gardens. It is attractive to bees and butterflies. It can be planted</p>  | 4.9 |

|   |  |      |

|  | Society. It likes moist soil which is well drained , fertile and rich in humus   |      |
| <b>Primula japonica<br/>'Appleblossom seeds cold treated</b> | Primula japonica 'Appleblossom' grows along stream sides in its native Japan. It is pink with a dark eye.  | 4.90 |
| <b>Primula japonica 'Deluxe Mix' seeds cold treated</b>      | Primula japonica 'Deluxe Mix' seeds produces candelabra primulas which are a mixture of dark and light pinks and dark reds. Also know as Redfield hybrids. They like moist conditions and don't like lime in the soil.   | 4.90 |
| <b>Primula x pubescens<br/>'Kaleidoscope' seeds</b>          | This seed selection has a brilliant coloured mixture of large flowering yellow, velvety-red, blue-lilac, creamy white and bicoloured variations borne over a mound of leathery mid green leaves. It has an award of garden merit from the RHS.<br>The plant likes moist humus rich soil which is well drained and is in part shade.They do not like heat nor can they tolerate humidity. It makes an excellent container plant.  | 4.9  |
| <b>Ptilotus exaltata-showy<br/>foxtail</b>                   | This is a compact short lived perennial, commonly grown as an annual. It has plume shaped flowers which range from pink to light purple. Flower spikes are usually about 50cm long. It flowers in winter through to early summer, and makes an excellent cut flower lasting for a long time in a vase. This plant needs very good drainage to prosper, and thus it makes an excellent plant for a pot .  | 4.90 |
| <b>Puya berteroniana seed</b>                                | This is a bromeliad which grows in the ground, and is related to pineapple plants . It has grey green leaves which are spiky like the pineapple. It produces lovely turquoise blue flowers from a stalk which can be up to 1.5 m tall. The flowers have central bright orange anthers. The whole flower stalk is very spectacular, and it is of interest in the garden as not only is it beautiful, but it is also rare. It will die down after flowering, but produces other small rosettes of leaves at the base of the plant, which will flower the next year. It does well in rock garden and is | 7.75 |

|  |  |      |
|--|--|------|
|  | also an excellent container plant.   |      |
| <b>Rhodanthe chlorocephala ssp rosea 'Pierrot' seeds - ( Helipterum roseum, Paper Daisy)</b>     | Rhodanthe chlorocephala ssp rosea 'Pierrot' seeds produce a pretty annual plant with pure white flowers which are like paper , and they have an eye-catching centre which has concentric rings of black and bright yellow. They grow to 50 cm, and are excellent for cutting and drying.   | 4.90 |
| <b>Rhodanthe chlorocephala ssp rosea 'Rose' seeds - ( Helipterum roseum, Paper Daisy)</b>        | This pretty annual plant has upright everlasting flowers, whose rose pink petals surround pale yellow centres. It makes an excellent cut flower, as well as being striking when grown en-masse as a wild garden meadow.  | 4.90 |
| <b>Rhodanthe chlorocephala ssp rosea 'White' seeds - ( Helipterum, Paper daisy, Everlasting)</b> | This pretty plant has long upright stems of everlasting pure white flowers with a light yellow eye. En- Masse they make an outstanding display as a wild meadow, and they are also an extremely good cut flower , prized for their long lasting qualities and also their excellence for drying.  | 4.90 |
| <b>Rhodanthe manglesii 'Maculata Rose' seeds - (Everlasting, Paper Daisy)</b>                    | This everlasting daisy has bright pink flowers which have a ring of red around the golden centres. It is an Australian native which is drought tolerant and makes a great show in the garden. It makes a very good cut flower and can be dried also.   | 4.9  |
| <b>Romneya coulteri</b>  | Romneya coulteri is a beautiful plant which has slightly leathery grey leaves. The leaves which rise from the woody base in the spring and die down again in the winter. The plant forms a shrub-like structure and from this emerge many fat buds. They open out to amazing white crinkle pleated papery petals, to form stunning white poppy flowers about 15cm wide. The flowers have deep egg yolk yellow centres. This beauty has won the Royal Horticultural Society award of Merit. It is an extremely beautiful flower which attracts attention whenever it is seen. Romneya plants like very well drained soil, a little on the dry side, but it is not a plant for small gardens reaching about 2 m tall | 4.90 |

|   |  |      |

|   | eventually and about 1.5m wide .   |      |
| <b>Rudbeckia fulgida 'Goldsturm' seeds - (Coneflower)</b>             | <p>This plant has wonderful large golden yellow daisy-like flowers borne in profusion . The flowers have black centres and are produced in summer. It is a very good cut flower, having long sturdy stalks.</p> <p>It is easily raised from seed and likes full sun though it will adapt quite happily to partial shade. It likes moist soil which is also well drained, but can tolerate some drought when it is firmly established, however, you will need to mulch it well.</p> <p>Deadhead regularly to extend flowering and encourage further blooms (and if you do not wish the plant to self-seed).It makes an excellent container plant.</p>   | 4.9  |
| <b>Rudbeckia hirta 'Cherokee Sunset Mix' seeds - (Gloriosa Daisy)</b> | <p>Rudbeckia hirta, 'Cherokee Sunset' is a fully double mix of large flowered yellow to bronze shades . It is very compact, easy to grow and offers lots of blooms in the heat of summer. It grows all season long and produces masses of flowers from January into March. It is great in containers and in the border, and is a good cut flower.</p> <p>Deadhead regularly to extend flowering and encourage further blooms. Deadhead if you do not wish to self-seed.</p> <p>This is a short lived perennial which is often used as an annual. It prefers a moist well-drained soil in full sun. Do not allow soil to dry out. Mulch if soil is prone to drying out. Once established however it will tolerate some drought if mulched well.</p> | 4.9  |
| <b>Rudbeckia hirta 'Cherry brandy'</b>                                | <p>This annual produces flowers for months on end on a robust plant. It has large 10cm daisy like heads with ruby red petals, which have a central black eye. It is a very good mixed container or border subject. It blooms in the first year from seed and is a good cut flower. Deadhead to encourage further blooming.</p>   | 4.90 |
| <b>Rudbeckia hirta 'Sahara' seeds</b>                                 | <p>This rudbeckia has a mix of autumn shades and soft pastels.It includes shades of copper, brown, pale yellow, and soft rose. It</p>  | 4.9  |

|   |   |     |
|---|---|-----|
|   | produces double and semidouble blooms which are approx 8cm wide. The plant is a compact one and is approx 55 cm high. It makes an excellent container plant.  |     |
| <b>Rudbeckia laciniata seeds - (Black Eyed Susan, Coneflower)</b>       | This coneflower is a remarkably hardy , handsome and easy care plant which flourishes at the back of a border, so long as the soil retains moisture well . Can also be used in a large pot as a specimen plant. It has extremely attractive green centred cones from which large, deep gold petals reflex. It flowers from mid summer right through until late autumn when the cold sets in.  | 4.9 |
| <b>Rudbeckia occidentalis 'Green Wizard' seeds - (Cone Flower)</b>      | This plant produces flowers which have black cones above green sepals. The petals which appear on other rudbeckia are almost entirely absent. The black cones are very good for cut flowers , lasting well in water and provide a handsome accent for floral work. It makes an excellent container plant.   | 4.9 |
| <b>Salpiglossis sinuata 'Superbissima Mix' seeds - (Painted Tongue)</b> | These old fashioned beauties are such lovely annual plants, which have shot velvet colour patterns in their throats. The velvety softness of the petals in these 8cm tubular treasures, creates a depth in the color patterning. The plants make an excellent plant for the garden and they also can be cut making a very unusual cut flower. Colors range from red, violet, yellow and chocolate, to bicolor forms in purples, orange, and blues. This plant likes warmth and well drained soil , with cool nights. It comes from the Andes. Note : Due to a lower germination rate , the number of seeds has been increased in the packet | 4.9 |
| <b>Salvia farinacea 'Victoria White' seeds</b>                          | This recipient of the Award of Garden Merit from the RHS , has white flowers which are produced all summer long. It is a small growing salvia to about 40cm and can be grown in the border or in pots. It flowers the first year from seed , about 4 months from germination if sown in early spring under cover.   | 4.9 |
| <b>Salvia argentea seeds - (Silver Sage, Artemis)</b>                   | This plant is a short lived perennial, which is grown for its unusual bright silver leafed foliage, which gradually turns to grey-green as the summer advances. The leaves are quite plump and fuzzy like a   | 4.9 |

|   |  |     |
|---|--|-----|
|   | <p>lamb's ear. It is best placed at the front of the garden where its beautiful tactile foliage can be appreciated. It dies down in winter and comes up again in spring. It is frost hardy to approx minus 20 deg C. If side shoots appear in the second year, they can be removed with some of the root and transplanted to propagate new plants. The plant will usually set some seedlings if left to flower, but usually it will die after flowering. The flowers themselves produce a lovely show and are displayed on 60 - 90cm stems. They are hooded white flowers which are faintly suffused with pink. Some gardeners remove them to keep the plant from spending all its energy, and to try and get it to last longer.</p>   |     |
| <p><b>Salvia nemorosa 'Blue Queen' seeds</b></p>          | <p>This is held by many to be one of the finest salvias. It is a vigorous small form of salvia which forms small bushy clumps. It has intense dark blue branching flower spikes which are produced in early summer, and one plant can appear like a solid block of dark blue, the flower spires are so thick. The plant repeats blooms later in summer and reproduces its fine display.</p> <p>It is a hardy, easily grown plant, and flowers the first year from seed. It can tolerate some drought, grows in spots where other less tolerant plants would complain, and doesn't mind heat.</p> <p>Seed sown from July to early September will produce good sized plants by December that will bloom in the summer of the first year.</p> <p>It is a plant that can fill a bare spot and look good in a very short time. If you grow in groups, it is a show stopper when in flower. It makes an excellent container plant. It flowers in the first year from seed.</p> | 4.9 |
| <p><b>Salvia nemorosa 'Rose Queen' seeds - (Sage)</b></p> | <p>Salvia 'Rose Queen' is an erect, clump forming hybrid perennial sage that produces many upright, dense flower spikes of hooded, tubular, Mulberry-rose over a long flowering period from summer onwards. It is fibrous rooted, and has an evenly branched form. The foliage is dark green and aromatic. The flowers attract bees and</p>  | 4.9 |

|  |   |      |
|--|---|------|
|  | <p>butterflies</p> <p>It looks equally good in pots and the garden.</p> <p>It likes well drained moist soil in full sun, but will tolerate any soil type. Pinch out growing tip when plant is 15cm tall to encourage bushy growth. Keep well watered until established. Fertilise monthly if desired.</p> <p>Remove faded flower spikes to prolong flowering. Deadhead if you do not want it to self-seed. If you wish to collect seed allow the spherical heads to become dry and brown before cutting. Do not remove old stems until new growth appears in spring. Best time to divide perennial Salvias is in early spring prior to new growth emerging.</p> |      |
| <b>Salvia nemorosa 'Violet Queen'</b>  | <p>This is a very attractive easy care drought resistant plant which has wonderful deep blue – purple flowers on a compact plant which forms a mound . It flowers non stop over summer until the end of autumn and is well worth while growing. Seed sown from July to early September will produce good sized plants by December that will bloom in the summer of the first year.It makes an excellent container plant. It flowers in the first year from seed.</p>  | 4.90 |
| <b>Salvia sclarea var. turkistanica 'Vatican White' seeds - (Clary sage)</b> | <p>This is a very beautiful biennial or short lived perennial. It has a rosette of large grey leaves which have a slightly felted appearance and above these the lovely white bracted tubular white flowers. This is a plant which requires very little attention, and grows well and when it is at full flower display it is spectacular. It prefers full sun and well drained moist or sandy soil. Butterflies and bees are attracted to it. It is generally disease free , but slugs , caterpillars and snails like the leaves so be prepared for them.</p>  | 4.9  |
| <b>Saponaria vaccaria 'Pink Beauty'</b>                                      | <p>This is a very pretty annual plant which makes an excellent light and airy filler, for bouquets and makes a lovely delicate filler for the garden as well. It looks like a gypsophila, forming a delicate airy plant with its pale pink single flowers and is very easy to grow.</p>   | 4.90 |
| <b>Saxifraga granulate seeds</b>   | <p>This plant is an English wild flower which is often found in old</p>   | 4.90 |

|  |   |      |
|--|---|------|
|  | <p>churchyards, meadows and dry banks</p> <p>This plant forms a nice rosette of glossy scalloped leaves which are kidney shaped. In late spring the lovely simple clusters of white flowers emerge . The plant dies down in the summer, and the leaves reappear in Autumn and winter.</p>   |      |
| <b>Scabiosa atropurpurea Daylight White' - (Pincushion flower)</b>         | This is a clear which pincushion flower. The plant makes a wonderful display of flowers in summer attracting bees and butterflies to its nectar filled flowers. It is very easy to grow from seed and is a recommended 'must have' for any garden.  | 4.9  |
| <b>Scabiosa atropurpurea 'Lavender' seeds - (Pincushion Flower)</b>        | This plant has large lavender flowers on long stems , which are excellent cut and also perform well in the garden, blooming constantly right through until autumn. Bees and butterflies love them.  | 4.9  |
| <b>Scabiosa atropurpurea 'Picotee Pincushion Mix' -(Pincushion flower)</b> | This is a completely new and different scabiosa. It is fresh from the experimental beds of this well known US breeder. You will get a mixture of flowers in dark red , black, garnet, raspberry, lavender, and red which will have lacy white fringes adorning the petals. If you are very lucky you may get flowers with pink fringes in these colours, and some rare examples of lavender flowers with raspberry picotee, and white with red picotee. These are exceptionally beautiful and completely new. Because these seeds are the first in this experimental range, you will almost surely get plants with flowers which have no picotee edges at all and are solid colours . But thats the joy of growing flowers, especially when there's a chance that you may get something unique and beautiful! | 4.9  |
| <b>Scabiosa atropurpurea 'Rose '</b>                                       | This plant has large rose coloured flowers on long stems , which are excellent cut and also perform well in the garden, blooming constantly right through until autumn. Bees and butterflies love them.   | 4.90 |
| <b>Scabiosa atropurpurea 'Sparky Vino'</b>                                 | This is a very dark red scabiosa which has unusual very bright blue anthers above the dark wine red petals. The stems are long and  | 4.90 |

|  |  |      |
|--|--|------|
|  | strong and make excellent cut flowers. Its a pretty plant for the garden and flowers well over the summer.   |      |
| <b>Scabiosa caucasica<br/>'Perfecta Alba'</b>  | This strain flowers the first year from seed. A native of the Caucasus Mountains, it has strong, stiff stems, and large flowers approx. 8cm or more in diameter.<br>It has lovely frilly, large white flowers which have long strong stems and are excellent as cut flowers. It attracts bees and butterflies and flowers and is very easy to grow. It has a very long flowering season. It likes full sun and fertile well drained soil. It can take some drought once established. Deadhead regularly to prolong flower production. Once the plant becomes larger it is wise to divide the root ball, discarding the older woody parts, to retain vigour.      | 6.90 |
| <b>Scabiosa caucasica<br/>'Perfecta Blue'</b>  | This strain flowers the first year from seed. A native of the Caucasus Mountains, it has strong, stiff stems, and large flowers approx. 8cm or more in diameter.<br>It has lovely frilly, large azure blue flowers which have long strong stems and are excellent as cut flowers. It attracts bees and butterflies and flowers and is very easy to grow. It has a very long flowering season. It likes full sun and fertile well drained soil. It can take some drought once established. Deadhead regularly to prolong flower production. Once the plant becomes larger it is wise to divide the root ball, discarding the older woody parts, to retain vigour. | 5.90 |
| <b>Scabiosa stellata seeds</b>   | This plant has lilac flowers in clusters. The seed pod forms a golf ball sized structure on slender stems which matures to a golden caramel colour with very attractive radial markings. This is used as a cut flower in floral and dried flower work.   | 4.9  |
| <b>Schizanthus pinnatus<br/>'Angels Wings' seeds -<br/>(Butterfly Wings Poor<br/>Man's Orchid)</b> | In summer these plants are smothered with delicate flowers, which resemble miniature orchids. The flowers have white and cream backgrounds over which pink, rose, red and violet patterns are painted in very fine tracery. They look like small, dainty butterflies, and they make a very lovely  | 4.9  |

|   |   |      |
|---|---|------|
|   | garden plant, with their finely cut leaves which are a little like delicate fern fronds. The flowers are excellent for picking, and they are easy to grow from seed.  |      |
| <b>Sidalcea malviflora 'Stark's hybrids' seeds - (Prairie Mallow)</b> | This lovely plant is like a fairy hollyhock , with its beautiful, delicate flowers on strong stems up to about 1 metre. It forms a bushy basal plant and the flowers are produced on multiple stems . This mixture has shades of pink, and sometimes a white as well. It makes an excellent and long lasting cut flower , and deserves to be better known.  | 4.9  |
| <b>Spiraea japonica 'Garnet 'n Gold</b>                               | Spiraea japonica is a small shrub growing to about 60cm , which grows quite slowly to the maximum height. It has golden foliage which is very attractive , and produces dainty flowers in sprays which can vary from pale to deep pink in colour. It flowers in early summer and then produces flowers intermittently for the rest of the summer.   | 4.90 |
| <b>Spiraea japonica 'Golden Princess'</b>                             | These spiraea seeds form a small bush which grows quite slowly to about 45 cm. It has pretty golden leaves, and dainty pink flowerheads borne in summer, with occasional flowers later in the season as well. It is a hardy plant withstanding heat and cold and is well worth growing for its easy care.   | 4.90 |
| <b>Silene asterias seeds - (Catchfly)</b>                             | This is a hardy and unusual perennial and rarely available. It has strong upright stems which begin to flower in late Spring. The flowers are borne in round clusters about 6cm wide which consist of small deep burgundy blooms which are held in dark red bracts. The bracts have very bright blue anthers, and together the mixture is very striking. The leaves themselves are attractive even when the plant is not in bloom, as they are bright spring green . It likes an organic soil which has good moisture retention in full sun . If the soil does not retain moisture well then put it in partial shade and mulch well. However the soil should not be waterlogged. It makes a good cut flower and is deciduous. | 4.9  |
| <b>Stachys byzantina seeds</b>  | This plant has velvet textured grey leaves, which everyone wants  | 4.90 |

|  |  |      |
|--|--|------|
|  | to touch. It forms a thick matt of striking coloured grey ground cover , which grows in full sun. It can also withstand soil which is lean. The flowers are purple , but not particularly prized, it is the leaves which no-one can resist.  |      |
| <b>Stachys officinalis-<br/>(Betony, Bishopwort)</b> | This plant has pretty pink flowers on upright stems , and it looks good in the cottage garden when planted in clumps . It has been used medicinally for many centuries for a number of maladies, but today is chiefly used for its flowering potential . It is a good cut flower.  | 4.9  |
| <b>Streptocarpus x hybridus<br/>'Dragon Mix'</b>     | Streptocarpus seeds produce an excellent indoor pot plant , and this mix of seeds produces flowers in a large range of colours including bicolours – (a few plain colours are pictured) . Streptocarpus seeds flower about 6 months from seed. They will withstand temperatures of about 12 Deg C in winter time, and so you can grow them outside in northern areas, unless it frosts in your area. For a pretty and rather unusual pot plant, try this one. It quite likes a shady spot so long as it is still warm and will produce its lovely flowers even with a bit of neglect.  | 4.90 |
| <b>Swainsonia formosa</b>                            | This native australian flower is from the dry desert parts of australia. It has magnificent bright red flowers, with very dark black centres. Some different forms appear from time to time and these can have flowers that range from white to pink and red with or without the black central spot. It is a short lived perennial , but is usually treated as an annual. Swainsonia formosa is a ground covering plant spreading up to about 3m wide and is approx 20cm tall. As this plant needs a small amount only of watering once established and extremely good drainage, a good place to grow it is in a pot filled with gritty soil and fine shingle in the full sun. It also does well in hanging baskets, and is sought after as an excellent and unusual cut flower. | 4.90 |
| <b>Tagetes erecta 'Savannah Ivory'</b>               | This lovely marigold has fully double creamy white flowers which are excellent as cut flowers. This plant is great for the back of the   | 4.90 |

|   |   |      |
|---|---|------|
|   | border and also makes an excellent plant for a pot . The leaves are ferny and make a nice display even without flowers. They look spectacular planted in drifts.  |      |
| <b>Tagetes lucida 'Perigon' seeds - ( Sweet Scented marigold, Mexican tarragon)</b> | This attractive plant grows into a small bush about 1 m tall eventually. Its leaves have a tarragon scent and are a glossy green. It is traditionally used for making tea and also for seasoning, but the small bright yellow flowers which are produced abundantly can also be used as a fragrant cut flower, and used for dye. It attracts birds and butterflies.   | 5.1  |
| <b>Tanacetum parthenium 'Magic Lime Green' seeds - ( Matricaria)</b>                | This matricaria has unusual lime green to yellow 2cm flowers on long strong stems . It flowers prolifically, is easy to grow and care for and is a great cut flower , but also performs well in the garden  | 5.90 |
| <b>Tanacetum niveum Jackpot' seeds</b>  | This plant has myriads of dainty small white daisy flowers with yellow centres appearing over pretty silvery coloured foliage. This is a plant which can be used effectively to soften plantings in the border. It forms a small well branched bush, and likes well drained, tending to dry soil. It flowers in its first year and looks great in pots where it does well .   | 4.90 |
| <b>Tanacetum parthenium 'Sunny Ball' seeds</b>                                      | Tanacetum Parthenium ' Sunny Ball' seeds produce a plant that has glowing yellow /gold flowers on a bushy plant with strong stems . It flowers prolifically, is easy to grow and care for and is a great cut flower , but also performs well in the garden.   | 5.90 |
| <b>Teleopea speciosissima</b>   | Teleopea speciosissima is a large plant to 3m tall, which lives for a long time. The flowers are usually bright red , but can also be pink or occasionally white. They make extremely good cut flowers, lasting for a long time in a vase. The plant likes partial shade , so dont plant it in full sun or in full shade as it wont flourish. The flowers are a rich source of nectar for birds, and you will see them visiting the bush often when they are flowering. | 5.90 |

|   |  |            |
|---|--|------------|
| <p><b>Thalictrum aquilegifolium seeds - (French Meadow Rue)</b></p> | <p>Thalictrum aquilegifolium is a very beautiful perennial. It has a basal mound of fine lacy bluish- green foliage that appears similar to an aquilegia.</p> <p>The flower stems which are produced in late spring and early summer are topped with large panicles of lavender -pink to white fuzzy flowers. Thalictrum is tolerant of warm humid summers, and prefer a rich soil which is moist. It enjoys dappled sun, but is fairly tolerant and will take partial shade. If it is kept moist it will tolerate full sun. It is an easy care plant, and if the seed is sown early enough in the season it will flower in the same year.</p> <p>Thalictrum aquilegifolium produces flower stems that rise above the foliage in late spring to early summer and are topped by a hazy, fuzzy show of purple flowers.</p> <p>Despite their delicate appearance, Thalictrum is fairly tolerant of warm, humid summers.</p> <p>They prefer a rich, humus rich soil on the moist side and dappled to partial shade, but will grow reasonably well in most borders if the soil is moisture retentive. In warm regions plants will tolerate full sun if kept moist. Clumps may be easily divided in spring when growth commences, and it is wise to divide it every 2-3 years to renew its strength. In midsummer, they add a lovely, gentle effect when combined with larger flowered plants and provide an excellent contrast to more architectural plants. They produce a shimmering hazy effect in beds and borders, and both leaves and flowers are good for flower arrangements.</p> | <p>4.9</p> |
| <p><b>Thalictrum delavayi seeds- (Meadow Rue)</b></p>               | <p>Thalictrum delavayi has beautiful, fine feathery foliage similar to a small aquilegia leaf, or perhaps a maidenhair fern leaf. Its clusters of mauve flowers are borne in panicles aloft on purple tinged stems in an airy spray of misty lilac mauve.</p> <p>Cut down stems as soon as flowering has completed. Divide the plant every 2-3 years as soon as growth begins in spring, in order to maintain its strength. Large divisions can be replanted</p>   | <p>4.3</p> |

|   |  |      |
|---|--|------|
|   | <p>outside, smaller ones overwintered in a greenhouse for planting out the following spring.</p> <p>Thalictrum are native to stream banks, shaded mountains, and moist meadows throughout most of the globe and thus they like dappled shade and moisture retentive soil , which is not waterlogged however. Most Thalictrum are late to emerge in mid to late spring, so take care not to disturb their crowns.</p>   |      |
| <b>Thalictrum rochebrunianum</b>                      | <p>This Thalictrum is prized for its sprays of arched lavender flowers with bright yellow stamens which hang from the light purple flowers like small and delicate stamens from a fuschia flower. It has very large ( for a thalictrum) flat grey green fern-like leaves which are like a huge aquilegia leaf. It can be used in many different situations in the garden – as it is a plant through which other flowers can be seen, and fits in well as a background plant or in groups where it appears to advantage. The flowers appear on lovely sturdy purple stems, and the pretty tracery of fine, ferny grey green foliage makes a very attractive ground cover in its own right, during the spring and summer. This plant blooms later than other Thalictrums, from mid to late summer and for a longer time period , and adds a vertical accent to the garden with its clouds of rose-lavender flowers. It is a good cut flower, is easy to grow and is not eaten by rabbits</p> | 4.90 |
| <b>Thelospermum burriganum - cosmidium</b>            | <p>These Thelospermum 'Philippine' seeds produce a plant that has chocolate and yellow flowers . They grow on slender 40cm stems and you can cut them for floral arrangements . Thelasperma make an attractive garden plant having very showy flowers and fine ferny foliage and flower continuously from mid summer through to late autumn . They perform well in wild flower gardens, and provide a bright display in a wild meadow. Thelasperma are very easy to grow from seed.</p>  | 4.90 |
| <b>Trachymene caeruleum 'Lacy White' - (Didiscus)</b> | <p>This is a lovely white flower with nice large lacy flowers. It is a very good cut flower and lends a light airy texture to any garden border.</p>   | 4.9  |

|   |   |     |
|---|---|-----|
| <b>Trachymene coerulea 'Lacy Blue' seeds - (Didiscus, Lace flower)</b>      | This is a pretty frothy lacy blue flower which makes an excellent cut flower, which gives a delicate appearance to bouquets. The 6cm flowers are held on straight stiff stems, and they have a mild, clean fragrance . The plant is well branched and grows upright. It has few leaves. This plant is well worth having in the garden as it produces blooms for up to two months.   | 4.9 |
| <b>Trachymene coerulea 'Lacy Pink' seeds- (Didiscus, Lace flower)</b>       | This is a pretty frothy lacy pink flower which makes an excellent cut flower, which gives a delicate appearance to bouquets. |--|---|-----|
|  | <p>with a sharp knife.</p> <p>This plant won a Royal Horticultural Society award of merit.</p>  |     |
| <b>Verbascum olympicum var album - ( White Mullein)</b>                      | <p>This is a handsome plant to add architecture to a garden , having long white or cream spikes of flowers which can light up a dull garden especially if displayed against a dark background. It makes an imposing and stately plant for the garden and will fit in well with any colour scheme. It likes a dry spot in the garden and can be used as a pretty pot plant.</p>  | 4.9 |
| <b>Verbascum phoeniceum 'Mixed Colours' seeds - (Mullein, Roman Candles)</b> | <p>This mix has a colour range of violet, red, pink and white . It blooms reliably and has lovely flowers held on thin airy graceful spires. It can be somewhat short lived ( 2 - 4 years) but will self seed readily for you. The small plants can be easily transplanted. If you deadhead the flowers it will re-bloom for you. Grow this plant in well drained soils which are not too rich in compost. It is drought tolerant and will self seed in the garden. It likes the soil to be a little dry . It makes a good container plant. It flowers in the first year from seed, about 6 months from germination, if sown under cover in early spring.</p> | 4.9 |
| <b>Verbena bonariensis seeds</b>   | <p>This verbenas has clusters of purple flowers borne on long graceful stems. It blooms from early summer to the frost in autumn and grows best in full sun or light shade. It looks good in mixed borders and works well with most plantings. It is very attractive to butterflies and bees. It flowers in summer of the first year from seed if started in early spring under cover. It makes a good cut flower, and can be dried for dried floral arrangements.</p>  | 4.9 |
| <b>Verbena hastata 'Pink Spires' seeds- (Pink Vervain)</b>                   | <p>Verbena hastata is a different plant from most commonly seen Verbena. It is hardy through most winters , and if it is sited in a sunny well drained spot its sheer volume of flowers make it a real winner. It is becoming very popular.</p> <p>Verbena hastata 'Pink Spires' produces stems of flowers which branch like large candles on an 18th century dinner table with lovely pink flowers which are produced in volume at the tips of the</p>   | 4.9 |

|   |   |     |
|---|---|-----|
|   | <p>stems.</p> <p>The flowers come in mid summer and bloom through into late autumn.</p> <p>Grow plants together in groups for the best effect. Pinch back when first planted to encourage branching. Water deeply to encourage root growth.</p> <p>If the seed is sown early it will flower in the same year. Cut flowers regularly to encourage growth and to prolong flowering . Deadhead if you do not want it to self-seed, and there will be another flush in autumn if you have deadheaded. Cut back old growth in spring once new shoots emerge at the base.</p> <p>This plant is easily grown in average, to medium, moist soils in full sun. It is a hardy plant and does not need staking, and gives an abundance of mid to late summer colour in the garden. The plants can also be used to advantage in a container.</p>  |     |
| <p><b>Verbena hastata 'White Spires' seeds -(White Vervain)</b></p> | <p>Verbena hastata is a different plant from most commonly seen Verbena. It is hardy through most winters , and if it is sited in a sunny well drained spot its sheer volume of flowers make it a real winner. It is becoming very popular.</p> <p>Verbena hastata 'White Spires' produces candelabra-like stems of lovely white flowers which are produced in volume at the tips of the stems.</p> <p>The flowers come in mid summer and bloom through into late autumn.</p> <p>Grow plants together in groups for the best effect. Pinch back when first planted to encourage branching. Water deeply to encourage root growth.</p> <p>If the seed is sown early it will flower in the same year. Cut flowers regularly to encourage growth and to prolong flowering . Deadhead if you do not want it to self-seed, and there will be another flush in autumn if you have deadheaded. Cut back old growth in spring once new shoots emerge at the base.</p> | 4.9 |

|   |  |             |
|---|--|-------------|
|   | <p>This plant is easily grown in average, to medium, moist soils in full sun. It is a hardy plant and does not need staking, and gives an abundance of mid to late summer colour in the garden. The plants can also be used to advantage in a container.</p>   |             |
| <p><b>Verbena hastata, 'Blue Spires' seeds - (Blue Vervain)</b></p> | <p>Verbena hastata is a different plant from most commonly seen Verbena. It is hardy through most winters, and if it is sited in a sunny well drained spot its sheer volume of flowers make it a real winner. It is becoming very popular.</p> <p>Verbena hastata 'Blue Spires' produces stems of flowers which branch like large candles on an old world dinner table with lovely blue flowers which are produced in volume at the tips of the stems. The flowers come in mid summer and bloom through into late autumn.</p> <p>Grow plants together in groups for the best effect. Pinch back when first planted to encourage branching. Water deeply to encourage root growth.</p> <p>If the seed is sown early it will flower in the same year. Cut flowers regularly to encourage growth and to prolong flowering.</p> <p>. | <p><b>Verbena rigida</b></p>  | <p>This is a smaller cultivar of verbena bonariensis. It is very good value in the garden flowering non stop until the end of autumn. Verbena rigida has scented purple flowers which attract bees and butterflies, and it likes moist well drained soil in full sun. It is an easy care plant, for gardens which don't get frost. Verbena rigida makes an excellent container plant, and flowers in the first year from seed if planted in early spring under cover.</p>  | <p>4.90</p> |

|  |   |             |
|--|---|-------------|
| <p><b>Veronica gentianoides 'Ramona' seeds -(Veronica)</b></p> | <p>This plant forms a low rosette of wide leaves with straight stems of ice blue, veined flowers which are produced over a long period from late spring and throughout summer. It has a compact habit which allows it to be used in tubs , pots and the front of the border. It makes a good cut flower.</p> <p>Cut back any spent flowers to encourage more flowers and also good growth the following year. Ensure that you water regularly during dry spells, and to give the plant a bit of pep , add extra phosphorus to encourage root development.</p> <p>The plant likes full sun but can also tolerate partial shade, and likes rich, moist, well drained soil but will tolerate any soil which is not too dry, in full sun or partial shade .</p> <p>When top growth is killed by frost, cut stems back to 3-5cm above the soil line.</p> <p>Veronica gentianoides is easily divided in fall or early spring, and is evergreen in mild winter regions. It can be propagated by seed or by division of congested clumps every 3 years.</p> | <p>4.9</p>  |
| <p><b>Veronica longiflora 'Blue Shades'</b></p>                | <p>Veronica 'Blue Shades' forms a bushy, upright plant of shiny green leaves . The vigorous vertical stems hold tall, slender blue spires which are packed with masses of densely grouped, small buds, the flowers open, one after the other, from the base to form a long-lasting spire.</p> <p>Veronica longifolia prefers a position in sun or part shade in moist well-drained soil, however it will tolerate drier soils, so long as it is mulched. Longifolia flowers in midsummer and lasts for several months into autumn, and adds a gentle columnar, architectural height to the border. It is an excellent contrast to more traditional flower shapes when grown at the front of the border, and is eye-catching when planted in drifts.</p> <p>The plant is attractive to bees, and butterflies and makes a good cut flower.</p>  | <p>4.90</p> |
| <p><b>Veronica spicata 'Alba'</b></p>                          | <p>This plant is a beautiful one for use as edging for borders, but also</p>  | <p>4.90</p> |

|  |  |      |
|--|--|------|
|  | makes a very good container plant. It is a low, compact, clump forming plant which has spikes of 30cm white flowers which are produced all summer long . It is a good cut flower and is attractive to bees and butterflies. It can be divided in spring or autumn. It is happiest in full sun, but will tolerate part shade. It is heat and drought tolerant once established.   |      |
| <b>Veronica spicata<br/>'Sightseeing' seeds -<br/>(Speedwell, Bird's eye)</b>                              | This is a mix of white pink and blue flowered plants, with extra long flowers which make great long lasting cut flowers and are attractive to beneficial insects. It is an excellent garden flower as well , making an attractive display. It makes an excellent container plant.  | 4.9  |
| <b>Veronicastrum virginicum<br/>f. albiflorum cold treated -<br/>(Culvers root, Black root )<br/>seeds</b> | This plant has long handsome spires of white or very rarely pale blue flowers. The flowers are quite like those of a blue veronica in form. They are dramatic when plants are fully in flower in mid summer. They can grow to approximately 175 cm and like a moist soil. It is an easy and adaptable plant requiring little care when established.<br>It will grow in full sun to part shade in most soils. It does not spread very far and stays in a compact mound , and does not require staking | 4.9  |
| <b>Viola hybrida 'Fire Shades'<br/>seeds</b>   | 'Fire Shades ' is a pretty mix of cherry red, pink and yellow. The viola's cheeky faces are perfect for a bright pot of colour on the balcony, and they do equally well in the garden. They can be picked for a small posy and the flowers are deliciously scented .   | 4.90 |
| <b>Viola hybrida 'Miniola Heart<br/>Aqua'</b>  | These viola seeds produce plants which have small flowers in an unusual combination of aqua , green and gold shades. A small delight to add to your garden, and good picking for small posies as well.   | 4.90 |
| <b>Viola wittrockiana 'Blackjack'</b>  | This is a very dark red , almost black pansy which trails. It can be used in hanging baskets or on the edge of a short wall and looks spectacular in groups planted together. It flowers abundantly all summer, and its bright gold eye calls attention to the flowers. The flowers can be picked for fresh posies   | 4.90 |

|   |  |      |
|---|--|------|
| <b>Viola wittrockiana 'Waraku midnight Moon'</b>                | This pansy produces flowers with a deep brown face which have golden centres and warm brown rays spreading out from the centres. The top petals are a soft deep violet blue which seems to glow against the deep brown faces. The flowers are mid sized with stout stems and the plant is compact and well branched. The plant can withstand winter temperatures well, and the flowers are good for cutting. In northern areas it will produce flowers through the winter for you. | 6.20 |
| <b>Xeranthemum annuum 'Mixed colours' seeds - (Strawflower)</b> | This plant has everlasting flowers in colours of yellow pinks purples and whites. They make wonderful dried flowers and are good cut fresh as well as making a good display in the flower garden   | 4.9  |
| <b>Xeranthemum annuum 'White Immortelle,</b>                    | This is the white form of the lovely double flowered xeranthemum. It puts on a very showy display of brilliant white flowers on strong, thin stems, and is lovely in the garden . It also makes an excellent cut flower and is great for drying as well  | 4.90 |
| <b>Zinnia elegans 'Benary Giant Bright Pink' seeds</b>          | The 'Benary Giant' strain is the premium zinnia. It is recommended by the Association of Specialty Cut Flower Growers. |  |   |      |
|--|---|------|
| <b>Zinnia elegans 'Candy Mix' seeds</b>        | This zinnia has very beautiful flowers which are like a scabious or pincushion flower. The mixture has bright colours which includes pinks reds and oranges. It makes an excellent cut flower and will attract bees and butterflies.  | 4.9  |
| <b>Zinnia elegans 'Giant Cactus mix' seeds</b> | <p>This mix has a choice blend of warm-toned blooms, each boasting masses of long, needle-thin petals with fascinating texture and long-lasting colour. As easy to grow as the more familiar Dahlia-flowered Zinnia.</p> <p>The blooms are fully double and stretch 10 to 12 cm across. Yet despite their massive size, they won't flop -- the long, strong stems are especially sturdy, keeping these blooms turned toward the sun in the garden or as cut flowers. There are many shades of colours in this mix of yellow, orange, red, rose, pink, salmon, and white. These plants reach 75cm tall and 30 cms wide, and begin flowering as soon as the summer weather arrives. They thrive in the blazing heat, asking only well-drained soil and adequate water to keep them colorful for months.</p> <p>Zinnias are one of the easiest annuals to grow, and attract butterflies to the garden. They are outstanding in beds, borders, and containers, and are the perfect cut flower--the more you cut, the more you get! They thrive in the sun and heat of summer, and ask only well-drained soil.</p> | 4.90 |
| <b>Zinnia elegans 'Giant Cactus purple'</b>    | This plant has very large 10cm quilled spiky dark purple flowers which are excellent for picking and look really special in the garden. They grow to about 90cm and love the heat of summer, creating an amazingly colourful display in your garden. They are very easy to grow from seed .   | 4.90 |
| <b>Zinnia elegans 'Gigantica Cherry'</b>       | Zinnia 'Gigantica Cherry' has very large double cherry red flowers. It makes an excellent cut flower and looks great in the garden. If you plant it in groups , they will make a lovely solid mass of cheerful colour.  | 4.90 |
| <b>Zinnia elegans 'Gigantica</b>               | Zinnia 'Gigantica Coral' has very large double coral  |      |

|   |  |      |
|---|--|------|
| <b>Coral'</b>                                   | coloured flowers. It makes an excellent cut flower and looks great in the garden. If you plant it in groups , they will make a lovely solid mass of cheerful colour.   |      |
| <b>Zinnia elegans 'Gigantica Golden Yellow'</b> | Zinnia 'Gigantica Golden Yellow' has very large double 13 cm golden flowers. It makes an excellent cut flower and looks great in the garden. If you plant it in groups , they will make a lovely solid mass of cheerful colour.  |      |
| <b>Zinnia elegans 'Gigantica Primrose'</b>      | This is a very large double flowered pale primrose yellow zinnia . It is an excellent cut flower , is very easy to grow from seed and performs well in the garden where its large showy flowers go well with most colour schemes   | 4.9  |
| <b>Zinnia Gigantica 'Lavender seeds'</b>        | This zinnia has very large double lavender flowers. It makes an excellent cut flower and looks great in the garden. If you plant it in groups , they will make a lovely solid mass of cheerful colour.   | 4.90 |
| <b>Zinnia gigantica 'Orange seeds'</b>          | This zinnia has very large double orange flowers. It makes an excellent cut flower and looks great in the garden. If you plant it in groups , they will make a lovely solid mass of cheerful colour.   | 4.90 |
| <b>Zinnia elegans 'Inca' seeds</b>              | Zinnia Inca has bright orange, fully double cactus flowers. The large flowers are 12 cm across, and twist and curl inwards catching the sun. The plant grows to approx 1 metre tall and forms a robust bushy plant. It is an excellent flower as a cut flower and also as a reliable and eye catching garden flower  | 4.5  |
| <b>Zinnia elegans 'Magic Bus' seeds</b>         | This new zinnia introduction is a selected cross between 'Jim Baggetts Choice mix' biggest orange zinnia balls with Zinnia 'Zowie'. The cross produces a 'Magic Bus' of brilliant colour intensities and unusual shapes and sizes. The supplier reports that this is a very diverse group of plant statures, degrees of doubleness, and color patterns and blends. Most of these will make good cut flowers. The magenta and neon red colors of zinnia 'Zowie' blend with Jim Baggett's big orange in the most unexpected ways, creating tri-toned pompoms, neon hued flowers and wonderful bright streaks of color. This zinnia is for those of you | 4.9  |

|   |   |     |
|---|---|-----|
|   | who like to grow unusual and different plants.  |     |
| <b>Zinnia elegans 'Oklahoma Mix' seeds</b>    | This is a mixture of all of the highly mildew resistant Oklahoma series zinnias. These are tall vigorous and healthy, and produce great cut flowers which have a long vase life. They also make a magnificent garden display, lasting into early winter ( for the northern part of the North Island).The flowers are approx 7cm rounded, mostly fully double blooms in magenta, red, yellow, pink , salmon and white on long strong stems and they are very easy to grow. Highly recommended.   | 4.9 |
| <b>Zinnia elegans 'Queeny Lime Red' seeds</b> | <p>This Zinnia has flowers which are very unusual and beautiful. The outer petals of the fully double flowers are pale red fading to lime green towards the centre of the bloom and with a deep maroon centre.</p> <p>It is an annual , and is as easy to grow as the more familiar Dahlia-flowered Zinnia.</p> <p>These plants reach 75cm tall and 30 cms wide, and begin flowering as soon as the summer weather arrives. They thrive in the blazing heat, asking only well-drained soil and adequate water to keep them dazzling for months.</p> <p>Zinnias are one of the easiest annuals to grow, and attract butterflies to the garden. They are outstanding in beds, borders, and containers, and are the perfect cut flower--the more you cut, the more you get! They thrive in the sun and heat of summer, and ask only well-drained soil.</p> | 5.4 |
| <b>Zinnia elegans 'Queeny Mix' seeds</b>      | <p>This Zinnia has very attractive and unusual chocolate peach brown coloured blooms which are large and are held above the foliage on good strong stems. As the flowers age they change to lime green. This provides a display of two colours on the one bush which is unusual and very attractive. They are loved by butterflies and bees</p> <p>Sowing advice<br/>Sow outdoors in spring and summer when the soil is warming up.<br/>Sow indoors Sep-Oct.</p>  | 5.4 |

|  |  |     |
|--|--|-----|
|  | <p>For best results sow zinnia where they are to flower (they like a sunny, sheltered position and don't like to be moved), but they can also be sown indoors in cell pots.</p> <p>Outdoors: Sow 3mm deep in drills 30cm apart into well prepared soil that has been raked to a fine tilth. Water regularly. Germination takes 7-14 days.</p> <p>Indoors: Sow into seed raising mix at temp. 15-25°C. Cover with 3mm soil. When large enough to handle transplant and grow on in cooler conditions. Acclimatise 10-15 days and plant out after danger of frost has passed.</p> |     |
| <b>Zinnia elegans 'Scarlet Flame' seeds</b>    | <p>This is a lovely old variety which has handsome double and semi double 12-14 cm scarlet-red flowers on long straight stems which are ideal for cutting. It blooms well and the blooms last for a long time. it has stood the test of time and is still an excellent cut flower and garden subject</p>   | 4.9 |
| <b>Zinnia elegans 'Zinderella Peach' seeds</b> | <p>These zinnias have very attractive peach orange blooms with cream and rose detailing which gives the flowers a peach colouring, with each producing a strong central crest. They are an excellent cut flower and will Add height and interest to the middle of the border, and will bloom right through summer for you.</p>   | 5.4 |
